greenID NOW ISO 27001 CERTIFIED

*VIX Verify's **greenID** platform provides customers worldwide with the most trusted, convenient, and compliant combination of consumer on-boarding and identity verification solutions.*

VIX Verify May 11th, 2017, a global leader in identity verification, is pleased to announce that the information security of its core identity verification system **"greenID"** has been certified as meeting the ISO 27001:2013 standard in Australia.

ISO 27001 is internationally recognised as a top-tier certification for Information Security Management Systems (ISMS). The ISO 27001 guideline on data protection prescribes the application of a risk management framework to business processes and IT systems to help manage risks to information security.

"By achieving the ISO 27001 certification, **VIX Verify** has demonstrated its commitment to implementing, maintaining and continually improving security controls to protect the data of its clients," said **Allan Sullivan, Chairman of VIX Verify**. "The ISO 27001 certification forms part of VIX Verify's long term vision for security best practice."

VIX Verify achieved the ISO/IEC 27001 standard following audits conducted in early 2017 by the accreditation body, SAI Global. **VIX Verify** was assessed across a number of areas including relevant policies, disaster recovery and resilience, risk assessments, procedures and governance. **VIX Verify** must complete regular follow-up audits to confirm continuing compliance with the ISO 27001 standard.

About greenID

greenID is a secure, privacy-compliant online service that verifies the identity of consumers in real-time. It is easy to implement and allows customers to verify their details themselves online, rather than in-store or in-person. **greenID** integrates biometric verification/authentication options, mobile on-boarding tools, and enables organisations to meet statutory obligations including Counter Terrorism Financing (CTF) and Anti-Money Laundering (AML) legislation.
