Englands Wading Jacket

Numerous lives reported saved

Our new wading jacket has been specially designed to include many practical features. It contains a fully automatic life jacket which will inflate within 3 seconds of water immersion. The unit is certified to self-right an unconscious person.

The outer material is olive green in colour and is a super strong yet light weight Microfibre. This material is very quick drying and also breathable.

Sealed seams are used throughout for maximum protection. Neoprene inner cuffs are used to prevent water ingression and the outer cuffs are fully adjustable for comfort.

The jacket features a peaked hood with draw cords for extra protection and is a high necked design for extra warmth. In addition, there are detachable fleece lined hand warmer pockets.

There are large front and rear pockets for carrying equipment and the jacket also includes front rod holders and rear net holders. The inside of the jacket features a mesh lining for comfort.

- **Super light weight**
- **Breathable Microfibre**
- **Neoprene cuffs**
- **Automatic life jacket**
- **Mesh lining**
- **Sealed seams**
- **Olive green**
- **Queen's Award recipient**
