

STC

Accepted in Canada

These quadrants were designed to improve the ergonomics of the throttle quadrants – the busiest part of the cockpit and reduce fatigue!

They also contain safe lock features to ensure your plane isn't going anywhere (called creep safe).

Tactile recognition is built into the design so flying is a heads up event.

Superior slide and numerous build features to ensure ultimate safety and wear resistance.

\$2,650 USD

#### STC'd in Canada:

- Factory Air-Tractor models: 402, 502, 504, 602, 802 STC#SA02266SE
