

CIRRO

Business Continuity

Data Sheet

Cirro protects digital assets and ensures the right balance between cost, quality and availability, based on customer need. Your business and systems need a flexible approach to business continuity and that's why we have created a number of services.

Reduce Risk, Improve Business Availability

Cloud Backup

Backup Onsite or Cloud systems (such as Office 365) to Cirro's Cloud environment

Cloud Restore

When disaster strikes, you can restore a back-up on our Cloud environment

Cloud Replication

Some onsite systems need to be highly available. We can replicate them to our Cloud

Cost & Performance

Cloud Back-up

Cloud Restore

Cloud Replication

- ✓ Highly Secure with 256 encryption
- ✓ GDPR Compliant
- ✓ Backup onsite or cloud systems, such as Office 365, OneDrive, Azure, AWS
- ✓ Experts in Business Continuity Design
- ✓ Flexible and agile services

01 Lowest Cost

- ✓ Available as Cloud Storage or Managed Backup Solution
- ✓ Backup systems and applications from multiple locations
- ✓ Back-up Office 365, OneDrive, AWS or Azure
- ✓ Manage retention policies and restore locations
- ✓ Browse and restore files, folder, applications or entire systems
- ✓ Auto-alerting and highly secure with 256 encryption

02 Most Flexible

- ✓ Ability to restore to Cirro Cloud Servers
- ✓ Eliminates onsite hardware requirements
- ✓ Managed Backup and Cloud Recovery
- ✓ Pre-build to your network and security requirements
- ✓ Quarterly manual test restores, fully documented to ISO 27701 and 22301 standards

03 Highest Performance

- ✓ Replicate an entire Data Centre or specific systems or applications
- ✓ Active/Passive or Active/Active designs
- ✓ Load-balance systems over onsite or cloud zones
- ✓ Re-balance and synchronise system changes on restored connectivity or primary location
