Group Policy Auditing

Lepide

LepideAuditor for Group Policy makes it easy to instantly see who, what, were and when changes are made and even allows you to roll back group policy changes to previous states. It automates alerting and reporting in order to streamline what could be a time-consuming, manual process. We provide this solution as an integrated feature of LepideAuditor for Active Directory; which is available either standalone or as part of our award winning LepideAuditor Suite.

Group Policy

Intuitive Dashboards

✓ Quickly identify Group Policy anomalies by choosing from 1 of our 11 dashboards
✓ Instantly see which of your IT team are making the most changes to your Group Policies
✓ Easily drill down into exactly what changes are being made.

Secure web-based console

✓ Easily separate out which reports delegated users are allowed to view
✓ Save time by allowing IT teams to delegate non-critical tasks to end users

Real Time Alerting

✓ Easily create alerts when specified events occur
✓ Quickly identify anomalies with threshold alerts
✓ Instantly receive real time alerts straight to the app, console or a specific email address

Granular Reporting

✓ Instantly see what's changed with a single log for a single change
✓ Easily identify the before and after of all changes made to areas including specific policies and links
✓ Effortlessly meet compliance and manage systems with hundreds of pre-defined reports

Roll Back Changes

✓ Immediately return everything to exactly as it was before the change

Mobile App

✓ Instantly see changes as they happen with our LiveFeed
✓ Designed to work on any Apple or Android enabled device

Awards

Lepide
