

ABOUT US

After 20 years in this industry **devon contract waste ltd** has established itself as a market leader in the southwest providing an honest, reliable and effective approach to waste management. We have grown considerably over the last few years but have never lost our dedication to being the best at what we do. The waste industry does become a bit of an obsession and it gets to be a way of life and never really has this been more important.

Although the recycling message may get a bit boring for some, it is essential that we all play our part to protect the world; however small your business or office it all makes a difference. It is vital that when choosing a waste and recycling contractor that you consider all the implications of that choice. It can reduce or even remove the benefit of recycling your waste if you use two or three contractors to collect it.

The advantages of using a local company that can manage all your waste and recycling is simply that it dramatically reduces the miles travelled to collect it. The bigger our client base becomes the bigger the benefit to our carbon footprint. This responsibility extends still further with us by ensuring all the recycling products we produce are reprocessed as close to the Southwest as is possible. Again our philosophy is based on the environmental benefit over the best prices in the market.

**IN THE REGION OF 600,000
TONNES OF LANDFILL
COSTS DEVON OVER
£20 MILLION
A YEAR!**

Did you know?

Around 600,000 tonnes of rubbish a year goes into Devon's landfill. That's the same weight as seven thousand, six hundred and eighty two Jumbo jets!

ZERO TO LANDFILL

DEVON CONTRACT WASTE

At **devon contract waste** we are a passionate bunch that are dedicated to providing the best sustainable solution for commercial waste producers in Devon and are very proud to be the **FIRST** and **ONLY** company to offer a **ZERO TO LANDFILL** solution.

Of course landfill still plays a role for some waste types but for resources that could otherwise be recovered being buried in the ground to rot over hundreds of years is simply not acceptable in this century. Our new plant has the capacity to divert over 75000 tonnes a year in Devon from landfill so now is the time for your business to stop land filling.
