Keyfort™

ITESP

It stands for IT Engineering Service Portal.
It allows Keyfort's customers to access their secure data 24/7.

It includes:

- Case management- allows Keyfort's customers to see the progress of open cases.

- Installation Management- allows Keyfort's customer to see the progress of any installations

- Change Control- allows the customers to create cases that Keyfort will need to solve.

- Network Status- allows Keyfort's customers to view the current statuses on their managed devices and services via the interactive map.

Benefits:

- Sensitive data is protected with a two-factor authentication.

- Enable you to access your secure data 24/7.

- Allows you to see the progress of any cases or installations and create new cases that Keyfort need to solve.

- Keyfort provides 24/7 help regarding any problems regarding ITESP

What did Google Authenticator say to the application?

I don't know! It changes every 30 seconds!
