Money Machine® 2
Self-Service Coin Counter

Build traffic, enhance banking hall experiences,
improve productivity

Enhance productivity with the world's most powerful coin processor

4,100 coins/minute
Fast, efficient coin processing

99.995% accurate
Ensures precise balancing

98% uptime
Ensures worry-free operations

Customisable options provide flexibility to suit your operational and promotional needs.

Accuracy and dependability

Balancing is easy when counts are accurate. Money Machine 2 processing is intuitive and precise, with 99.995% accuracy. This translates into worry-free operations, less time managing coin processing and improved branch efficiency.

Unmatched dependability– warranted to 50 million mixed coins– ensures uninterrupted service to your customers and branch personnel. The Money Machine 2 is designed with only one moving part, which means fewer jams and lower maintenance costs.

Customisable touch-screen display

A large 15" colour touch-screen guides customers through the coin-counting process. Custom graphics, images, and multi-lingual text give you the flexibility you need to promote products and services as well as cater to a diverse audience.

World-class service and support

Cummins Allison service technicians stand behind each product. Delivering dependable, local service and parts inventories, each skilled professional is trained to maintain your specific product requirements.

Increase customer service and maximise cashier efficiency

Money Machine 2 is an essential service-delivery tool

Money Machine 2 self-service coin counters are the fastest, high-capacity coin processors in the industry. The Money Machine 2 provides an essential service for your customers and keeps cashiers focused on service delivery, cross-selling opportunities and enhancing customer experiences. As the world's most powerful coin counter and sorter, the Money Machine 2 gives your customer-facing employees the ability to alleviate time-consuming coin processing tasks and focus on your business' most important assets – your account holders.

Increase branch traffic. Make it easier for your customers to deposit their saved coins and see an increase in branch traffic. Use this opportunity to up sell and cross sell on various financing promotions.

Build loyalty. Generate increased customer loyalty by offering a convenient means to redeem coins for deposit or customer spending.

Improve customer experiences. Reduce queues and customer wait times by installing a conveniently placed, user friendly coin counting machine in your branch.

Traffic-building service

Building traffic creates valuable opportunities for interacting positively with existing branch clients as well as prospective new accounts. Additional face-time with customers also enables cashiers to educate customers about financial products that can help them reach their financial goals.

Location loyalty

The promise of more or better services is a primary motive leading customers to re-evaluate their relationship with their bank. Installation of a coin counter helps you gain new customers and ensures your account holders visit your branch for their coin processing needs.

Enhanced experiences

Whether coin savers are asked to prepare coins by counting and bagging before bringing them in for redemption, must wait in queues, or are not allowed to redeem their coins at all, customer dissatisfaction is the inevitable result. Automating the task using self-service counters puts the customer in control of their experience and gives them greater satisfaction – provided the machine gives an enhanced experience. Selecting the Money Machine 2 for your branch's coin-counting needs ensures your customers receive a level of service excellence above reproach.

Bin coin collection provides large coin capacity – up to 70,000 coins – as well as handling simplicity. Bin collection minimises interruptions and maximises machine uptime.

Money Machine 2 features and options

Money Machine 2 is built for fast, effortless operation and best-in-class reliability. Designed to maximise customer satisfaction, it provides tremendous feature flexibility to suit your preferences and operational requirements.

Coin-collection systems

A choice of four coin-collection systems makes coin management and pickup flexible.

Single or dual bin: Coins are securely collected and stored for transport in a single mixed coin bin holding up to 70,000 or two bins holding up to 140,000 mixed coins.

Mixed or sorted bag: A system of 16 high-volume bags hold up to 80,000 coins, mixed or sorted by denomination.

Coins are securely collected and stored for transport in a 70,000 mixed-coin-capacity single bin or in dual bins with a combined capacity of up to 140,000 mixed coins.

Bag collection sorts and mixes coins into 16 high-volume bags. Bag stations roll out for easy access.

Remote management access

Keep tabs on one or more Money Machines through remote-management software. Remote management gives you immediate access to bin/bag levels, daily reports and transaction history in real-time, with instant notification of error alerts. Schedule bin pickups, update machine messages or monitor activity from your desktop or smartphone.

Enhanced bag management screens

Personnel will appreciate the highly visual bag management system displayed on the unit's LCD. Steps for changing full bags are simplified and the interactive display keeps training to a minimum.

High-strength, polymer bins are easy to change with lightweight dollies and can be stacked for easy storage.

Dual bin coin collection minimises interruptions and maximises machine uptime.

Leverage the high demand for coin redemption to increase branch traffic, improve customer satisfaction and stay ahead of the competition.

Machine graphics

Outfit your coin-counting machines with eye-catching graphics. Choose to design your own graphics, use standard Cummins Allison graphics or choose attractive stainless steel panels to give an elegant finish to your lobby decor.

On-screen advertising

Advertise products and services through fixed images or continuous-play videos. On-screen advertising provides high visibility to your most important promotions.

Choose how coin counting is added to your branch

You have the freedom to own your coin machine, place a machine in your branch free of charge, rent or lease a machine. Whatever option you choose, your customers will enjoy the benefits of a self-service coin machine.

Stainless steel graphics provide a more elegant finish to match your lobby decor. Machine shown with optional charcoal hood.

Money Machine 2 self-service coin counter

Standard features

High speed processing: At speeds as fast as 4,100 coins per minute, the Money Machine 2 boasts the fastest coin sorting in the industry.

Advanced debris management: Debris such as paper clips, screws, bolts and bent coin is diverted to a debris cup for easy disposal.

Continuous suspect coin detection: Suspect coins are uncounted and diverted to a coin return cup while maintaining the unmatched coin sorting speed.

Transaction memory and reporting: More than 30,000 transactions are stored in the Money Machine 2 memory. Daily reports can be easily obtained at any time by authorised employees (as many as 100 individual user passwords.)

Customisable screen display: Customised graphics can be placed on the initial customer greeting screen. Text can be customised with specific phrases such as service fee amounts and fee disclaimers.

Customisable transaction receipt: Up to four lines of text can be printed on both the top and bottom of the customer receipt. In addition, as many as two logos may be printed on the receipt.
