

BtL Mobile – Overview

Whether you're a corporate, medium or small sized business, we have the ability to tailor a business mobile package to suit your requirements. BtL can manage all your mobile needs to ensure you are getting the best value for money, even if you want different networks for different parts of your business.

BtL aim to offer you the most competitive tariff on the right network for your business. We will take a consultative approach to your business with the intention to free up your time and increase your productivity, utilising our extensive experience in the mobile communications industry.

BtL offer mobile packages, tariffs, PAYG and mobile broadband services across the three major networks, Vodafone, O2 and Everything Everywhere, as well as providing a full range of high demand handsets and devices. We can also offer flexible contracts, such as mixed deals across networks on a single BtL invoice, shortterm mobile contracts, and bundled minutes for high users and line rental for low users.

Key Features:

- The ability to mix and match between the best 3 providers in the UK – Vodafone, O2 and Everything Everywhere
- Can build a unique package to meet individual requirements by combining PAYG users, Sharers, International users etc.
- Can provide all handsets with different payment methods such as a Kit Fund, Leasing Options etc.

International Mobile Services and Roaming

We offer roaming and international services and bolt-ons for high international usage clients. We also have our own Mobile Interceptor service, which is a free to rent service (only pay once used) which offers cheaper calls/texts to international destinations all over the world. Mobile Interceptor can be added to your mobile contract to drastically reduce the cost of calls to international and out of bundle numbers.
