DVRs - alienHYBRID 4, 8 & 16Ch

alienHybrid *Duel IP & Analogue* gives you **the best of both worlds**

- ✓ *D1 Resolution H264 with stunning picture quality*
- ✓ *Unlimited Monitoring & Integration of 1000+ DVR / HVRs*
- ✓ *Records IP Megapixel and Analogue Cameras*
- ✓ *Dual Analogue & IP Camera Inputs*
- ✓ *Real-Time Recording on all Channels*
- ✓ *Simultaneous Multi-Channel playback*

The superb alienHybrid HVR works with both analogue cameras and IP cameras. This makes new systems and upgrades easier all round. Installers don't have to worry about compatibility and end-users can upgrade their VCR or DVR to the alienHybrid HVR but still use their existing analogue cameras and add new IP ones as and when needed.

Real-Time all Channels	D1 Recording	Remote Internet
Live Images on	Device Control	Email Notification
Network Back-Up	Remote Local Back-Up	Remote Data Store
HDD Management		

Up to D1 Resolution	Multi-Ch Playback	Intelligent Recording
Electronic Mapping	PTZ Control	2 Way Talkback
Auto Time Synch	Instant Detective	High Definition
VoiceOff Ready		

FREE *remote control*

Instant Detective - *allows you to select a specific area in an image recording and search it for video motion detected events*

For Example

A car is stolen from a car park. Instant Detective allows the CCTV operator to select the area in the camera's image where the car had been parked and look for video motion detection within a given time slot that occurred only in the depicted area. Any activity within that area of the camera's recorded image can quickly be accessed and saved for vital video evidence.

Alarm Signals Over IP

Use up to 16 IP cameras to trigger motion detect over a LAN connection requiring no additional wiring back to the HVR.

Remote Device Control

Using the CCTV Window software, you can remotely control up to 16 relays from anywhere in the world. Floodlights, electric gates, a bell box or a sounder can be switched on and off using this superb feature.

DVRs - alienHYBRID 4, 8 & 16Ch

alien hvr

Remote Data Store

In addition to its own massive storage of 8TB (with DVD fitted), the HYBRID can also stream CCTV recordings to a networked PC or server for additional back up away from the DVR itself.

Live CCTV images on Your Mobile!

Using the latest Smart phones (Symbian, Windows, Blackberry and now iPhone & Android), you can connect to the alienHYBRID DVR using a mobile phone, see live images and even control PTZ.*

Remote Internet Monitoring

Connect from anywhere in the world and watch live or recorded images on a standard PC or laptop with the free remote monitoring software supplied. Using the same software, the HYBRID can also be networked to allow users to easily monitor CCTV images from the PC at their desk.
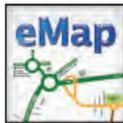

Real-Time Record on All Channels

The alienHYBRID HVR records in real-time video from each of its 4, 8 or 16 camera channels so you don't need to miss a thing. Each analogue channel can record up to 25FPS in D1 quality.

Email Notification of an Alarm Event

Be alerted of a visitor or an intruder at home when you're at work, from your business when you're not there or wherever you are in the world! The HVR sends an email with 3 JPEG attachments showing the "activated" CCTV camera image taken before, during and just after the alarm event occurs.

Electronic Mapping

eMaps can be embedded into the superb CCTV Window software to enable the user an easy way to select and see images from a camera in a simple & intuitive graphical user interface.

D1 Resolution & UXGA

The alienHYBRID can record in real time on all analogue channels in D1 resolution and up to UXGA resolution on IP cameras.

Multi-Channel Playback

Operators can see what happened where and when using the HVR's multi-channel playback feature to view up to 16 cameras at once on the same screen!

Talkback - 2 Way Audio Feature

The HYBRIDS's built in 2-way and 2 zone audio channel allows a user to talk back to 2 separate areas under surveillance using an external speaker such as the Voice Off VOX200.

PTZ Control

The alienHYBRID HVR can be used either locally or over a network or the Internet to control PTZ cameras on the system. It can use most protocols and will control cameras via the free client software on a PC or even using a mobile phone* instead of a PTZ keypad. Enhanced zoom can also be obtained locally using the mouse to select an area of the PTZ display to digitally zoom in.

Easy Back-up

Once recorded on the HDD, recordings can be grouped for fast back up onto a DVD or to an external USB drive. Footage is easy to retrieve using the free CCTV Window software to back up files over a network or over the internet onto a different PC.
