## A Specialist 'Designed to Fit' service to suit any changing room environment

Space comes at a premium and most clients want to maximise the use of whatever changing room space is available to them.

That is why the vast majority of projects that Arkinstall undertake have a specialist and bespoke nature to them. This can vary from reduced sized units to create a uniform fit within a given area, to a complete and newly designed product to meet a particular need. This service is provided free of charge on a no obligation basis.

**We offer all or part of the full 'Designed to Fit' service as appropriate:-**

- A free no obligation site survey to discuss changing room needs and to assess options
- A free design service providing optional floor plans in cad and pdf format
- 'Made to measure' product design proposals which can range from custom lengths for standard products to completely new hybrid designs to suit a particular purpose
- An optional installation service
- Optional additional finishing services
- Competitive pricing and reliably short lead times

With a design and manufacturing pedigree going back over 50 years, we have many case studies of successful projects including; education, public sports and leisure, MOD, Fire and emergency services and professional football clubs.

# ARKINSTALL BENCHES LOCKERS STORAGE

A bench system that's fit for purpose... to suit your style

### 20 SERIES

A highly functional bench system - ideal for those working within tight budget restraints. Designed to withstand the rough and tumble of the harshest environments the 20 series is suitable for locations liable to abuse including public areas, penal and secure institutions.

### 30 SERIES

Our most popular bench system, competitively priced, versatile and hard wearing. Traditionally a favourite with educational establishments but equally at home in any environment, combining the strength of steel and the aesthetics of natural hardwood.

### 60 SERIES

Specifically designed to withstand the various atmospheric conditions associated with wet changing and shower areas. Utilises carefully selected and developed materials, treatments and finishing. This system is both durable and corrosion resistant - a functional choice that is aesthetically pleasing.

All available in a wide range of designs.

# 20 SERIES

Manufactured from a range of mild steel sections and powder coated to a range of standard RAL colours.

A functional modular system with a wide range of design and accessory options available.

The 20 series bench is supplied in simple self assembly form as standard but can also be of a fully welded construction for extra strength and security (subject to dimensional limitations).

# ARKINSTALL BENCHES LOCKERS STORAGE

# 30 SERIES : 60 SERIES

The 30 series range marries the robustness of a steel framework and the beauty of natural hardwood timber.

The design of this system allows for the versatility of providing a 'made to measure' product with numerous options.

Footbars, shoe trays and baskets and even under seat lockers can be 'designed in' to this range whether you require a single bench or a much larger package.

Add to this a selection of hooks and hangers in various materials and you can see why the 30 series is so popular.

Once fabricated the 60 series framework is degreased, phosphated and zinc primed before being electro-statically powder coated to one of a wide range of standard RAL colours.

Seat tops and hook rails are manufactured from 13mm Trespa Athlon solid grade laminates (other laminate ranges available) with all cut edges machined finger safe.

Bench tops can be single piece or slatted and all fixings are supplied in stainless steel.

# Specifications

## Perimeter Units

Wall rail  
 W101/5 Hooks @ 300mm CTRS  
 W101/10 Hooks @ 150mm CTRS  
 W101/15 Hooks @ 100mm CTRS
