

## FETOga CLARITY 220

### Aluminium 3 Flute Cutter

- Especially designed for aluminium

### ASX Coating

- Increased feeds and speeds, reducing cycle times
- Extended tool life
- Improved surface finish

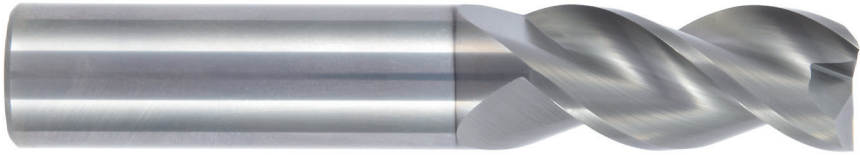

### Enhanced Tool Geometry

- Ground with 3 teeth to centre to create a balanced tool
- Added wipers for excellent surface/floor finish
- Tapered core for added strength
- Manufactured with wide gullets and unique geometries for maximum swarf evacuation
- 40° Helix for reduced harmonics

### Increased Production

- Suitable for roughing and finishing applications with the same tool
- High performance cutting
- Plunge, ramp and run at higher feed rates.

## 220

Especially designed for aluminium Kildare Tooling's Fetoga high performance solid carbide, 3 flute end mill Clarity 220 is a unique cutter with a noticeably longer tool life.

Manufactured with wide gullets and enhanced flute geometries for maximum swarf evacuation, tapered core for added strength and ground with 3 teeth to centre the Clarity 220 will plunge, ramp and run at high feed rates. With these key features and the latest ASX coating the Clarity 220 allows for roughing and finishing using the same tool, increasing productivity, while producing excellent surface finish.

The Fetoga Clarity 220 is available in sizes 3mm - 20mm.
