Progeria Research Foundation

PRF By The Numbers: A Data Sharing Tool

- PRF By The Numbers is a **data sharing tool** originating from The Progeria Research Foundation's programs and services.

- We translate information collected within our programs and services, and develop charts and graphs which track our progress from year to year.

- This allows you to assess where we've been, and the improvements we've made for children with Progeria.

Progeria Research Foundation

Why Sharing Data Is Essential

- According to the National Institutes of Health:

  "data sharing is essential for expedited translation of research results into knowledge, products, and procedures to improve human health."

  http://grants.nih.gov/grants/guide/notice-files/NOT-OD-03-032.html

- In other words, everyone benefits by knowing and learning as much as possible about Progeria - the scientific and medical communities, the public, and the children.

NIH National Institutes of Health
Turning Discovery Into Health

Progeria Research Foundation

PRF By The Numbers…Here's How It Works

- We take raw data collected through our programs and services, remove any personal information to protect the participant, and present it to you in a format that is engaging and informative.

- PRF programs and services include:

  - The PRF International Registry
  - The PRF Diagnostics Program
  - The PRF Cell & Tissue Bank
  - The PRF Medical & Research Database
  - PRF Research Grants
  - Scientific Workshops
  - Clinical Trial Funding and Participation

Progeria Research Foundation

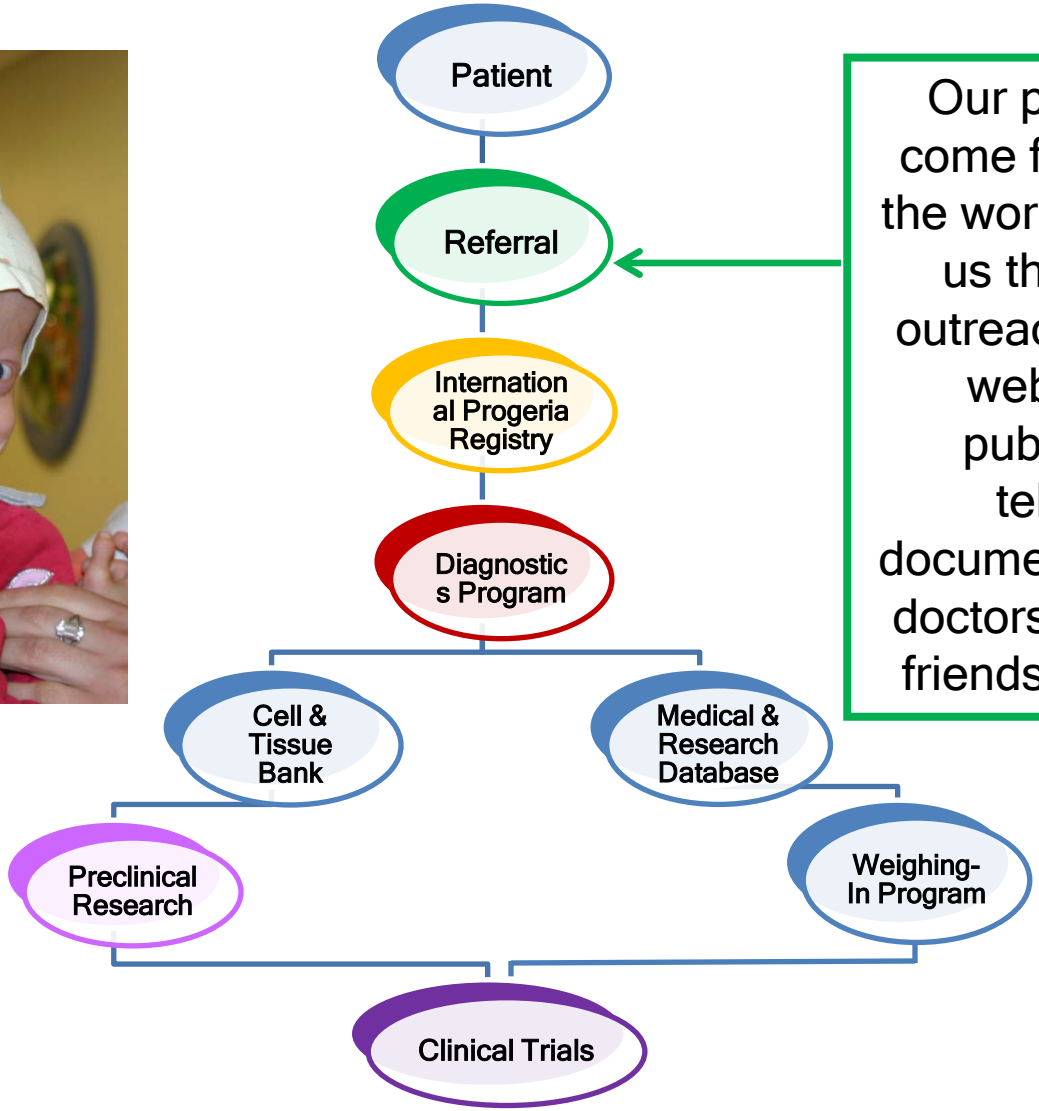
Our Target Audience

- PRF By The Numbers is intended for a broad array of users
  - Families and children with Progeria
  - The general public and nonscientists of all ages
  - Scientists
  - Physicians
  - The media
- This means that different types of slides will be of interest depending on who is looking at the information. We have designed this slide set so that you can pull out what is most important to you.
- We love suggestions - if you don't see some facts and figures here that you think would be informative, please let us know at

info@progeriaresearch.org

Progeria Research Foundation

PRF Programs: It All Starts With The Children



Our participants come from all over the world. They find us through our outreach – the PRF website, our publications, television documentaries, their doctors, neighbors, friends and family.

Progeria Research Foundation

Number of Living PRF-Identified Cases

As of January 1, 2017:

Total Number of Children with Progeria Worldwide: 144

HGPS* worldwide: 111

HGPS* in the United States: 16

Progeroid Laminopathies** worldwide: 33

Progeroid Laminopathies** in the United States: 9

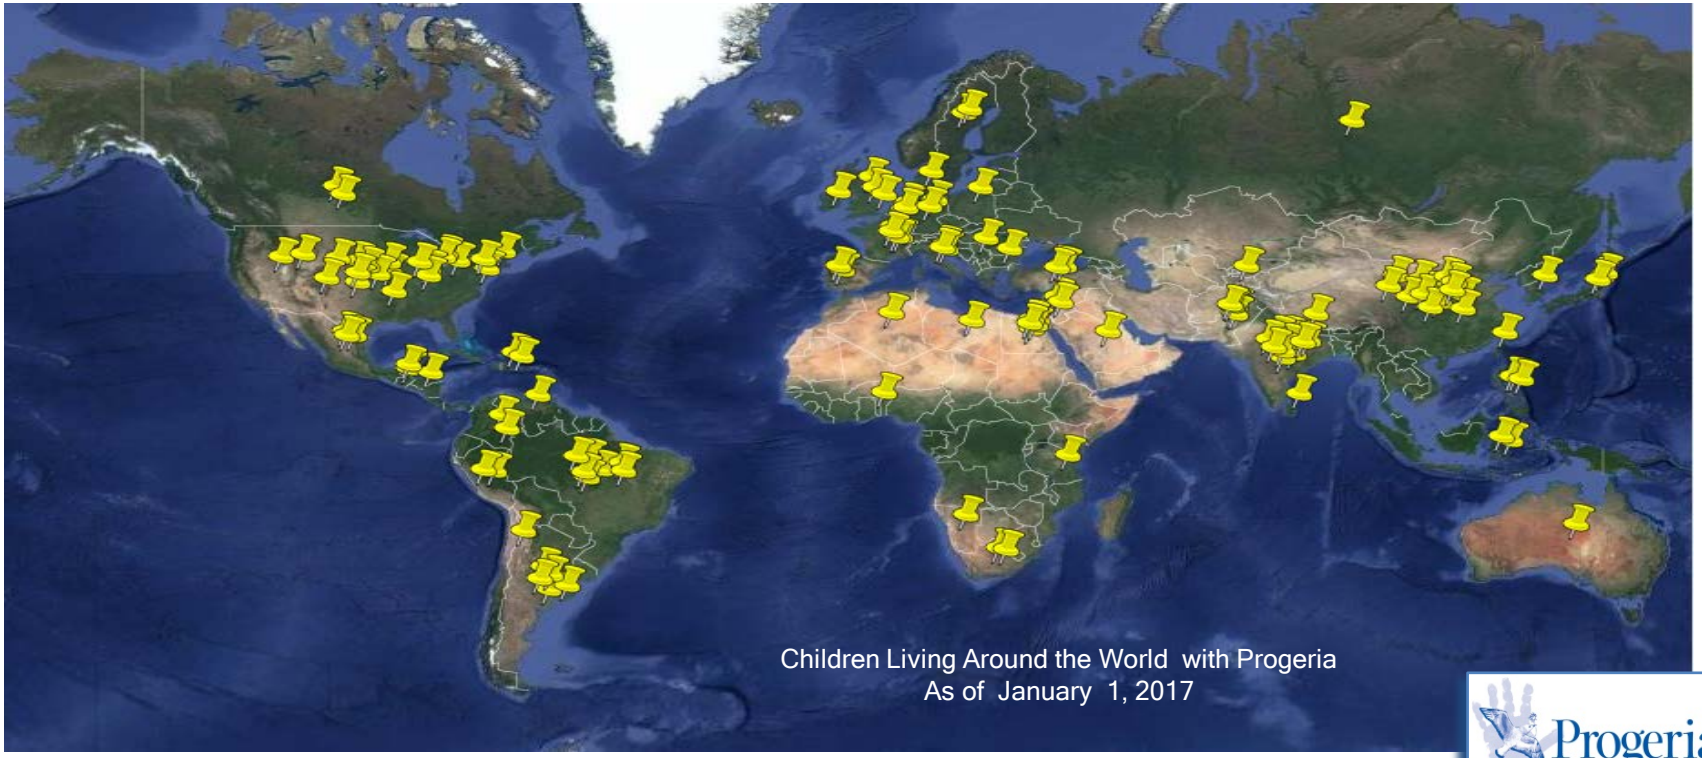
*Children in the HGPS category have a progerin-producing mutation in the LMNA gene

** Those in the Progeroid Laminopathy category have a mutation in the lamin pathway but don't produce progerin

Progeria Research Foundation

PRF-Identified Cases Reside In 46 Countries

Algeria	Canada	Dominican Republic	Guatemala	Israel	Namibia	Poland	South Africa	Taiwan
Argentina	Chile	Egypt	Honduras	Italy	Nepal	Portugal	South Korea	Tanzania
Australia	China	England	India	Japan	Pakistan	Russia	Sri Lanka	Togo
Belgium	Colombia	France	Indonesia	Libya	Peru	Saudi Arabia	Sweden	Turkey
Brazil	Denmark	Germany	Ireland	Mexico	Philippines	Serbia	Tajikistan	USA
								Venezuela



Progeria Research Foundation

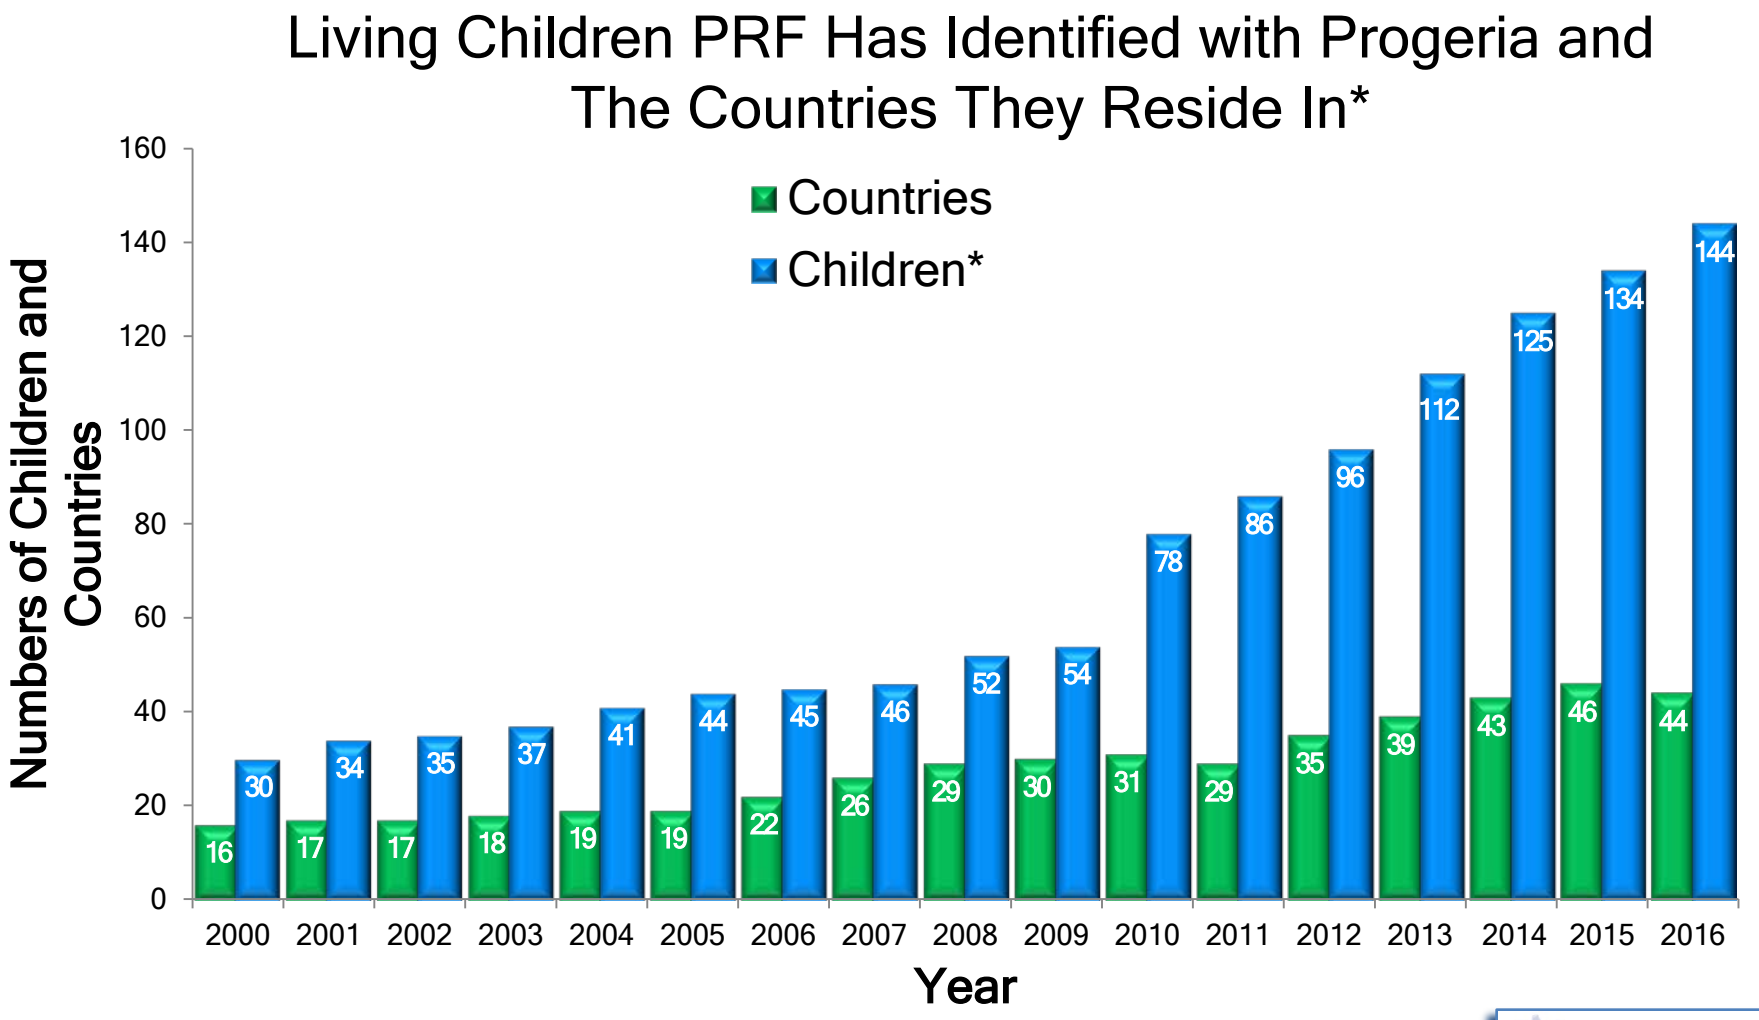
Every Year Our Numbers Grow



*When a child passes away, numbers are decreased.
Numbers include those with HGPS and genetically confirmed Progeroid Laminopathies

Progeria Research Foundation

Tracking Children with Progeria Through Prevalence

- How does PRF estimate how many children we are searching for, and in what countries? We use ***population prevalence***.

- Prevalence is the proportion of children with Progeria per total population.

Progeria Research Foundation

How Prevalence Is Estimated

- At PRF, we use a formula based on the number of children we've identified in the US. We then expand that out to the world population.
- We do this because we have the most complete reporting for the US and since Progeria has no gender, ethnic, or other biases, we assume that the prevalence in the US is the same prevalence in other countries.
- PRF estimates prevalence for years when the official US census provides a reliable population number.

Progeria Research Foundation

USA Prevalence of Progeria

January 2016 population statistics:

- The US population was:

  322,761,807 people

- Number of PRF-identified children with Progeria in the US:

  16

- Prevalence of HGPS in the US:
  16 in 323 million is about

  1 in 20 million people

Source: 2016 US population: http://www.census.gov/#

Progeria Research Foundation

Prevalence and World Population of Progeria

Given the world population as of January 2016

there are between **350** and **400** children living with Progeria worldwide.

PRF strives to find every child with Progeria because

in order to help every child, we must find every child

Progeria Research Foundation

Using Prevalence To Find Children In A Certain Country

We can now use the total population estimates for any given country, in order to understand whether we have found most or all children in a particular country.

- For example, as of January 2016:

Brazil's population was estimated as

205,809,000 people

Number of children living with Progeria in Brazil is

205,809,000/20,000,000 = **10**

Source Brazil population: http://en.wikipedia.org/wiki/List_of_countries_by_population

Progeria Research Foundation

International Progeria Registry*

Program Goals:

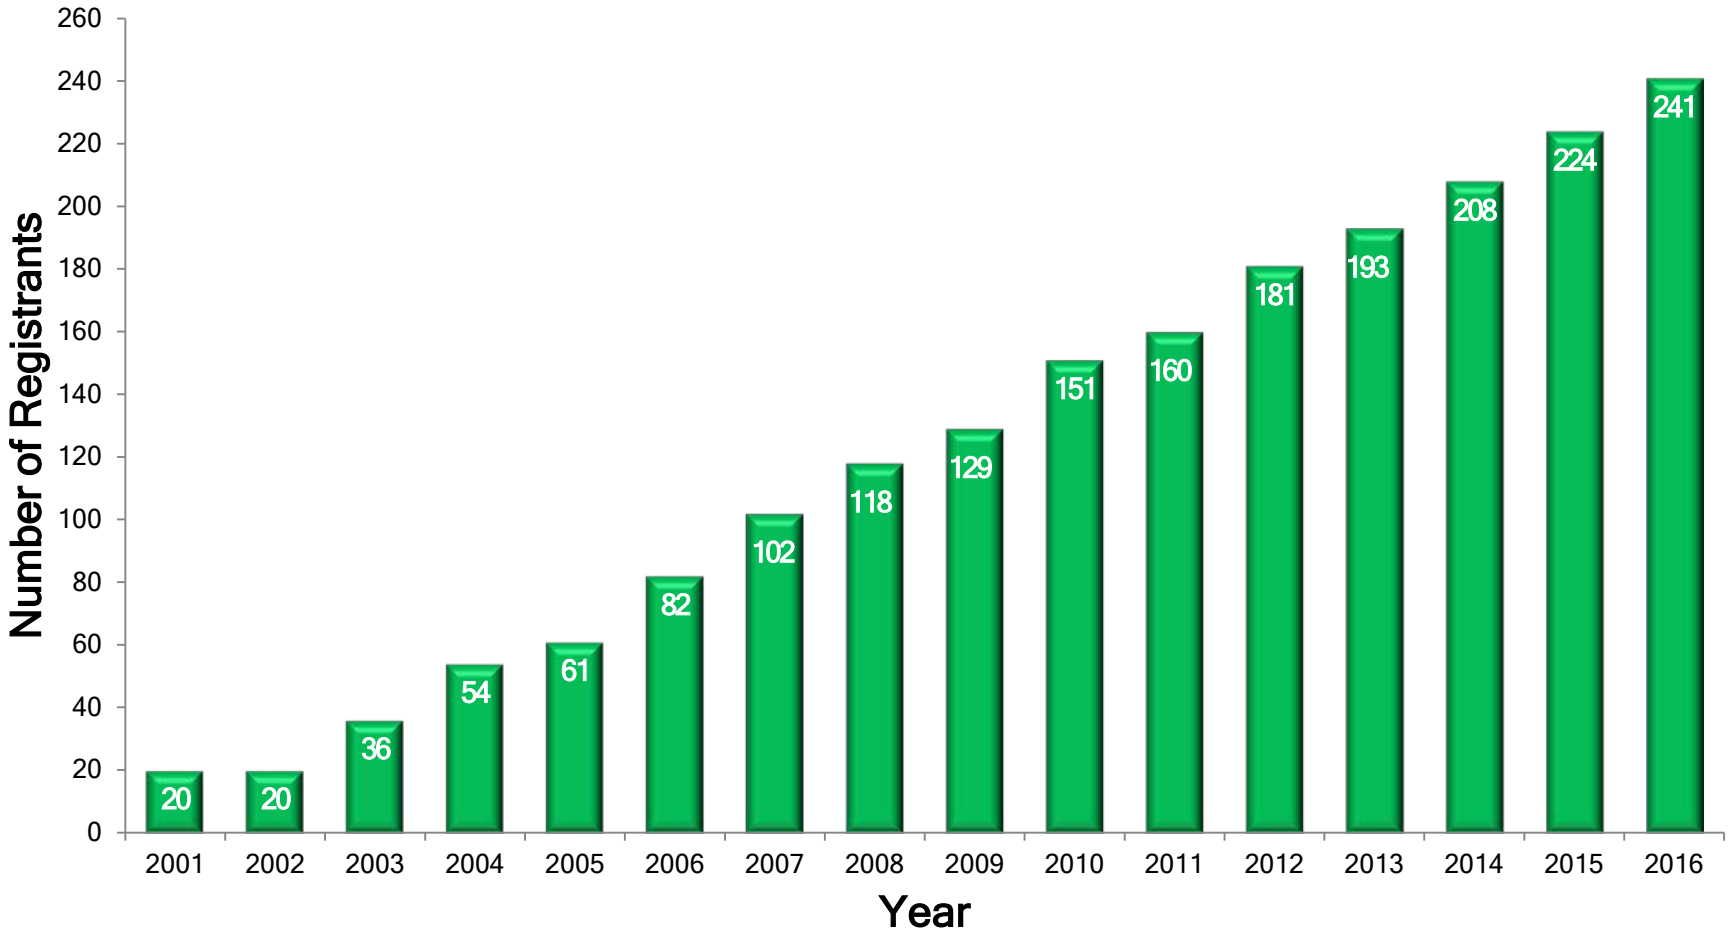
- Patient identification
- Outreach to patient families and their physicians
- A springboard for program enrollment

Registry forms available at www.progeriaresearch.org/patient_registry

*PRF International Registry includes those with genetically confirmed or clinically suspected Progeria, as well as those with other possible progeroid syndromes

Progeria Research Foundation

241 Children Have Registered With PRF



Progeria Research Foundation

…From 55 Countries

As of January 1, 2017

Progeria Research Foundation

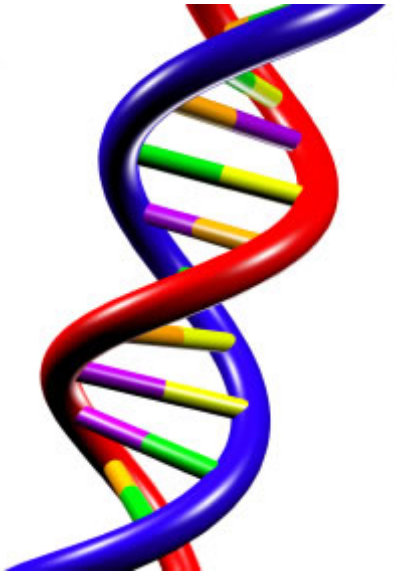
PRF Diagnostics Program

Program Goal:

- Genetic Sequence Testing for Progeria-causing mutations

Pre-requisites for Testing:

- Registration with PRF International Registry
- One or more of the following
  - Family history - proband, prenatal
  - Phenotypic presentation - proband, postnatal
  - Relative of positive proband



Testing information available at

www.progeriaresearch.org/diagnostic_testing

Progeria Research Foundation

Diagnostics Testing Summary

As of January 1, 2017:

Total Number of Proband Tests Performed: 127

Exon 11 (HGPS) Mutations: 87

Other Progeroid Laminopathies (Exons 1 – 12): 10

Zmpste24 Mutations : 2

Average Number of Patients Tested Per Year : 10

All tests are performed in a Clinical Laboratory Improvement Amendments (CLIA) certified facility.

Progeria Research Foundation

Mutations Identified Through PRF Diagnostics Program

DNA Mutation	Amino Acid Effect	Zygosity	Progerin Producing?	Number Diagnosed
Classic HGPS - LMNA Mutation				
1824 C>T, exon 11	G608G	heterozygous	Yes	74
Non Classic HGPS- LMNA Mutation				
1822 G>A, exon 11	G608S	heterozygous	Yes	4
1821 G>A, exon 11	V607V	heterozygous	Yes	2
1868 C>G, exon 11	T623S	heterozygous	Yes	1
1968+5 G>C, intron 11	---------	heterozygous	Yes	2
1968+1 G>C, intron 11	---------	heterozygous	Yes	2
1968+2 T>A, intron 11		heterozygous	Yes	1
1968+1 G>A, intron 11		heterozygous	Yes	1
Progeroid Laminopathy- LMNA Mutation				
1579 C>T, exon 9	A527C	heterozygous	No	1
1579 C>T, exon 9	A527C	homozygous	No	6
1580G>T, exon9	A527L	Homozygous	No	1
1619 T>C, exon 10	M540T	homozygous	No	1
331 G>A, exon 1	G111L	heterozygous	No	1
Progeroid Laminopathy- Zmpste24 Mutation				
1274T>C, exon 10	L425P	homozygous	No	2

Progeria Research Foundation

PRF Medical & Research Database

Program Goals:

- Collect the patient health records for living and deceased children with Progeria
- Obtain long-term clinical data
- Abstract data for longitudinal and cross-sectional analyses
- Better understand the clinical disease process in Progeria and aging related diseases
- Develop treatment strategies and recommendations for health care professionals and families

Progeria Research Foundation

How The PRF Medical & Research Database Works

- Project staff obtain the patient's medical records and film studies from birth throughout the participant's lifespan.
- Medical records include visits to: primary care physicians, specialty physicians, hospital emergency rooms, hospital admissions, dentists, physical therapy, occupational therapy and school health records.
- Retrospective data abstraction protocol allows for specifically targeted or broad spectrum of data.

Enrollment information available at: www.progeriaresearch.org/medical_database

Progeria Research Foundation

Medical & Research Database Participation

152 Participants are enrolled from **42** countries and **1** US territory

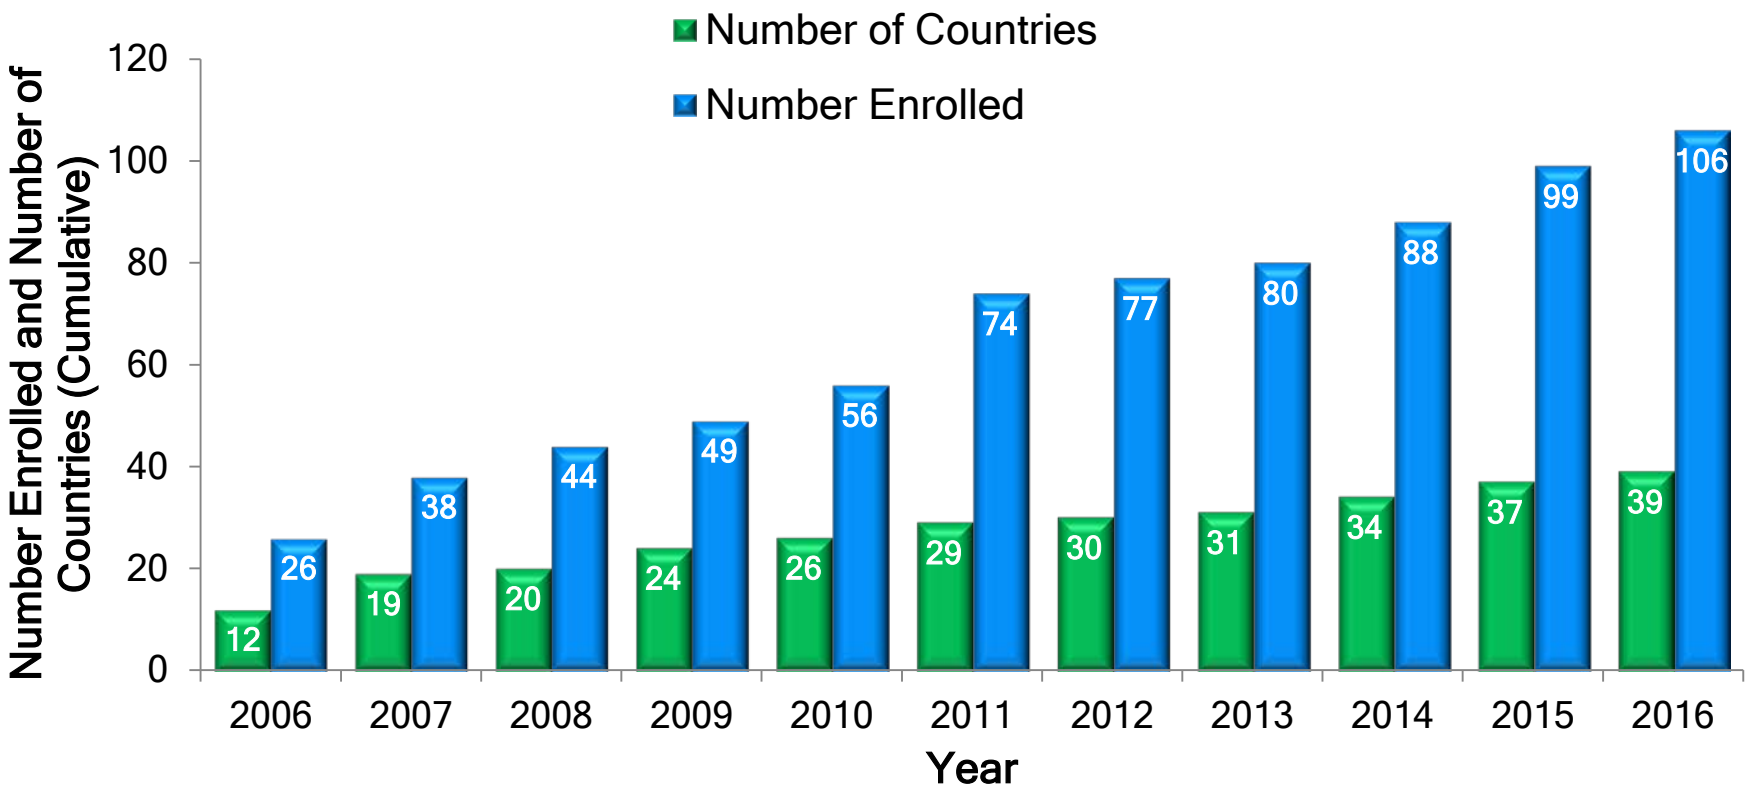
Participants Enrolled In The PRF Weighing-In Program and Countries of Residence

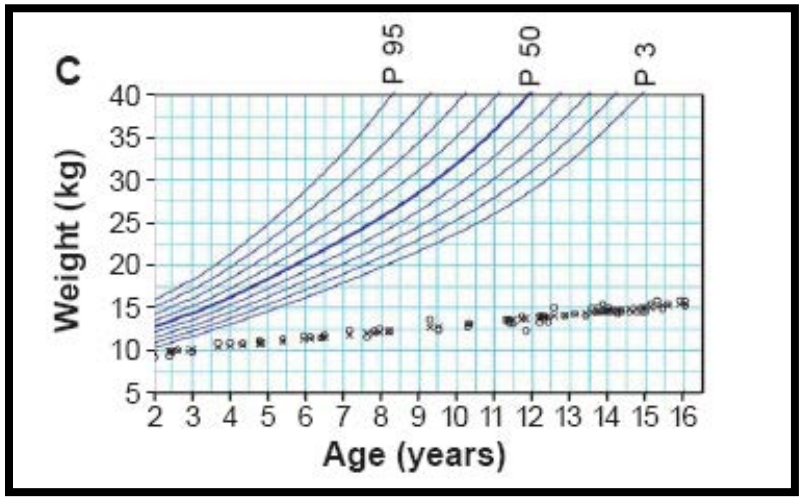


Progeria Research Foundation

Clinical Trials And The Weighing-In Program

- Data from this program were key in the development of primary outcome measure for the first drug treatment trial for Progeria.

- As of January 1, 2017, **78** children from The PRF Weighing-In Program have entered clinical treatment trials using this data.



Failure to Thrive Starts Towards End of Year One

Progeria Research Foundation

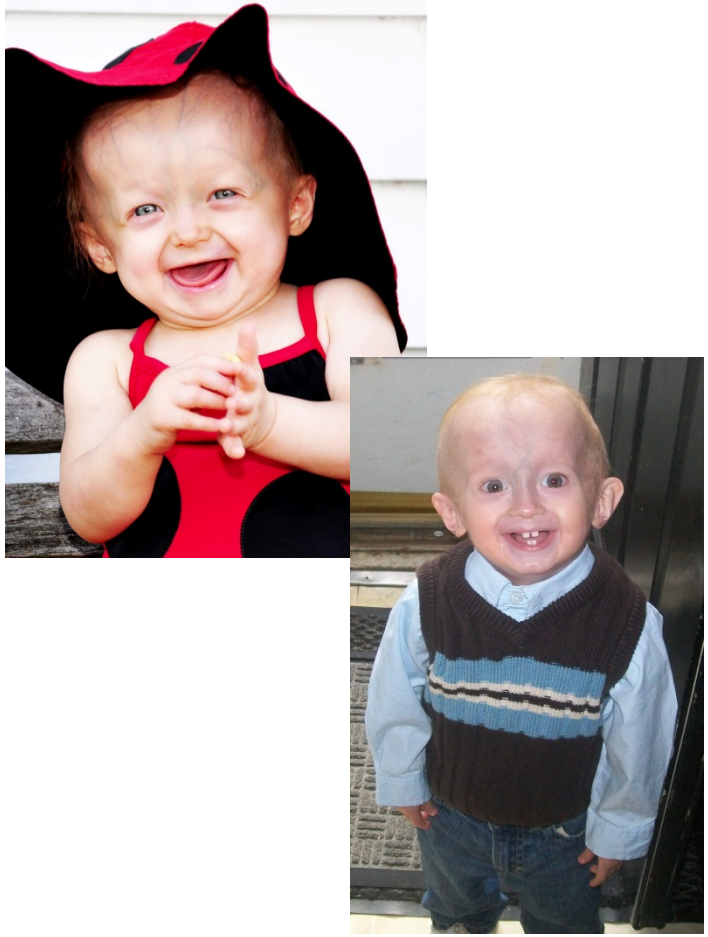
PRF-Funded Clinical Treatment Trials

Progeria Research Foundation

Clinical Drug Treatment Trials

Goals:

- To define the natural history of HGPS in quantifiable terms that will expand our ability to measure treatment outcome
- To assess the safety of new treatments for HGPS
- To measure effects of treatments for children with HGPS on disease status, changes in health, and survival



Progeria Research Foundation

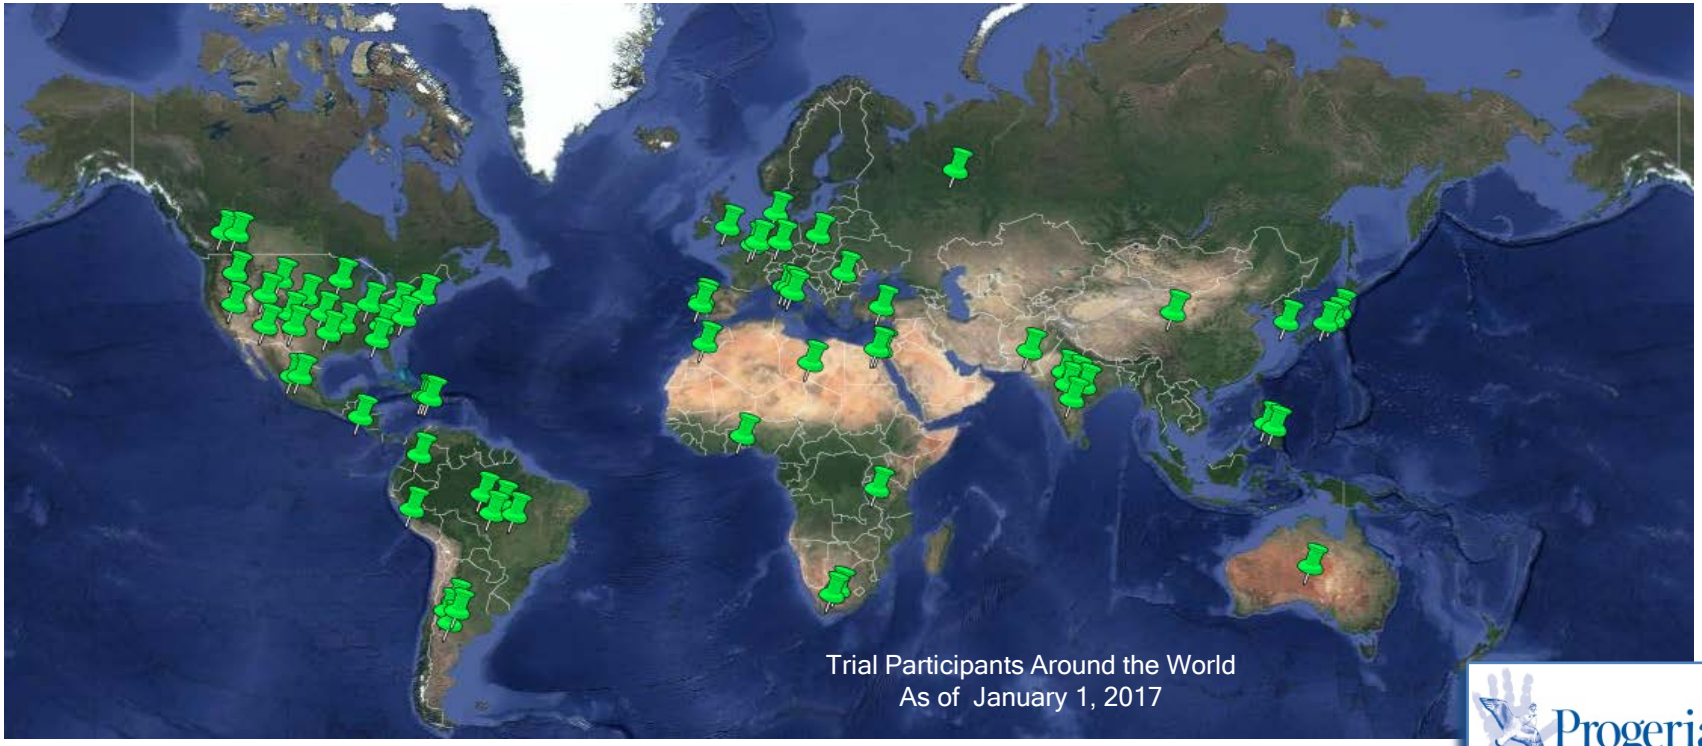
Participation in PRF Clinical Trials

83 Children have participated in PRF Clinical Trials from **34** countries:

Argentina	Canada	Dominican Republic	India	Libya	Peru	Romania	Sweden	USA
Australia	China	England	Israel	Mexico	Philippines	Russia	Tanzania	Venezuela
Belgium	Colombia	Germany	Italy	Morocco	Poland	South Africa	Togo	
Brazil	Denmark	Honduras	Japan	Pakistan	Portugal	South Korea	Turkey	



Treatment Trial Collaborations For Success

- **The children are seen by physicians from:**
  - Boston Children's Hospital
  - Dana-Farber Cancer Institute
  - Brigham and Women's Hospital
- **Data were also generated by scientists from:**
  - Alpert Medical School at Brown University
  - Brown University School of Public Health
  - University of California Los Angeles
  - National Human Genome Research Institute
  - Schering-Plough Research Institute
- **Lonafarnib generously provided by Eiger**
- **Everolimus generously provided by Novartis**

Clinical Treatment Trial Efficacy Results

Lonafarnib, a type of farnesyltransferase inhibitor (FTI) is our first treatment for Progeria.

- Results showed improvement in:
  - Rate of weight gain
  - Increased vascular distensibility
  - Improved bone structure
  - Better neurosensory hearing

Progeria Research Foundation

PRF Grants Program

Program Goals:

- Attract high level researchers to the field of Progeria
- Foster high quality publications
- Stimulate novel research that will lead to larger grants from other resources such as NIH, Ellison Foundation, and others
- Provide ability for researcher to thrive in the field
- Foster researchers of interest to PRF's mission

Grants program information available at

Progeria Research Foundation

PRF Granting Structure

- Innovator Awards:
  - 2 years, up to $75,000 per year
  - Allows an investigator to embark on new areas and produce enough preliminary data to compete for longer-term funding by NIH and/or other agencies.
- Established Investigator Awards:
  - Up to 3 years, up to $100,000 per year.
  - For senior investigators established either in the field of Progeria or a field that can be directly applied to Progeria
- Specialty Awards:
  - Funding amounts and lengths flexible
  - For smaller, technology-driven projects, e.g., sequencing, drug screening, obtaining cell lines, antibody preparation, animal models, other

Progeria Research Foundation

Grant Funding Rates And Topics

As of September 1, 2016, The PRF funding rate is **33%**

- Since inception, **193** grant applications received and **64** funded
- PRF has funded **56** principal investigators from **45** institutions in **13** countries

  - Lamina A, progerin, Lamin B in HGPS and aging
  - Genetics and nuclear function
  - Preclinical Drug Therapy
  - Molecular Abnormalities and Therapies
  - Vascular Pathology
  - Mouse Models
  - Stem Cell Investigations and Therapy
  - Clinical Trials

Progeria Research Foundation

USA PRF Grantees

GRANTEE NAME	INSTITUTION
Jemima Barrowman	Johns Hopkins University
Juan Carlos Belmonte	Salk Institute for Biological Studies
Ted Brown	The Institute for Basic Research in Developmental Disabilities
Kan Cao	National Institutes of Health; University of Maryland
Christopher Carroll	Yale University
Francis Collins	National Institute of Health
Lucio Comai	University of Southern California
John P. Cooke	Houston Methodist Research Institute
Kris Dahl	Carnegie Mellon University
Jed W. Fahey	Johns Hopkins School of Medicine
Loren Fong	UCLA
Michael Gimbrone	Brigham & Women's Hospital
Thomas W. Glover	University of Michigan
Robert Goldman	Northwestern University
Leslie B. Gordon	Tufts University School of Medicine; Brown University
John Graziotto	Massachusetts General Hospital
Brian Kennedy	Buck Institute for Research on Aging
Jan Lammerding	Cornell University
Dudley Lamming	University of Wisconsin Madison

As of September 1, 2016

Progeria Research Foundation

USA PRF Grantees

GRANTEE NAME	INSTITUTION
Joan Lemire	Tufts University of Medicine
Jason Lieb	University of North Carolina
Monica Mallampalli	The Johns Hopkins School of Medicine
Susan Michaelis	The Johns Hopkins School of Medicine
Thomas Misteli	National Cancer Institute
Marsha Moses	Harvard Medical School; Boston Children's Hospital
Junko Oshima	University of Washington
Bryce Paschal	University of Virginia
Joseph Rabinowitz	Temple Medical School
John M. Sedivy	Brown University
Dale Shumaker	Northwestern University
Michael Sinensky	East Tennessee State University
Brian Snyder	Beth Israel Hospital
Dylan Taatjes	University of Colorado
Jakub Tolar	University of Minnesota
Katherine Ullman	University of Utah
Thomas Wight	Benaroya Research Institute
Katherine Wilson	Johns Hopkins University
Stephen Young	UCLA
Yue Zou	EastTennessee State University

As of September 1, 2016

Progeria Research Foundation

International PRF Grantees

GRANTEE NAME	INSTITUTION
Vicente Andrés Garcia	Centro Nacional de Investigaciones Cardiovasculares, Spain
Samuel Benchimol	York University, Toronto, Canada
Bum-Joon Park	Pusan National University, Korea
Claudia Cavadas	University of Coimbra, Portugal
Jesús Vazquez Cobos	Centro Nacional de Investigaciones Cardiovasculares, Spain
Thomas Dechat	Medical University of Vienna, Austria
Karima Djabali	Technical University of Munich, Germany
Maria Eriksson	Karolinska Institute, Sweden
Gerardo Ferbeyre	Université de Montreal, Canada
Célia Ferrera de Oliveira Aveleira	University of Coimbra, Portugal
Roland Foisner	Medical University of Vienna, Austria
Evgeny Makarov	Brunel University, England
Silvia Ortega-Gutiérrez	Universidad Complutense de Madrid, Spain
Charlotte Sorenson	Aarhus University, Denmark
William Stanford	University of Toronto, Canada
Colin Stewart	Institute of Medical Biology, Singapore
Anthony Weiss	University of Sydney, Australia
Zhongjun Zhou	University of Hong Kong, China

Progeria Research Foundation

PRF Scientific Meetings

Meeting Goals:

- To promote collaboration between basic and clinical scientists toward progress in Progeria, cardiovascular, and aging research

PRF has held **11** international scientific meetings

2016 PRF Workshop

Progeria Research Foundation

International Workshops Promoting Global Interest In Progeria, Cardiovascular Disease And Aging

These are large multi-day workshops open to all scientists. Clinical and basic researchers spend intense days sharing data and planning new collaborations for progress towards treatments and cure.

Various NIH Institutes have funded all international workshops through R13 and other granting mechanisms

Other organizations have also generously sponsored workshops

NIH National Institute on Aging

NIH National Institutes of Health
Turning Discovery Into Health

NIH National Human Genome Research Institute

NIH National Center for Advancing Translational Sciences

ORDR Office of Rare Diseases Research

NIH National Heart, Lung, and Blood Institute

NIH NATIONAL CANCER INSTITUTE

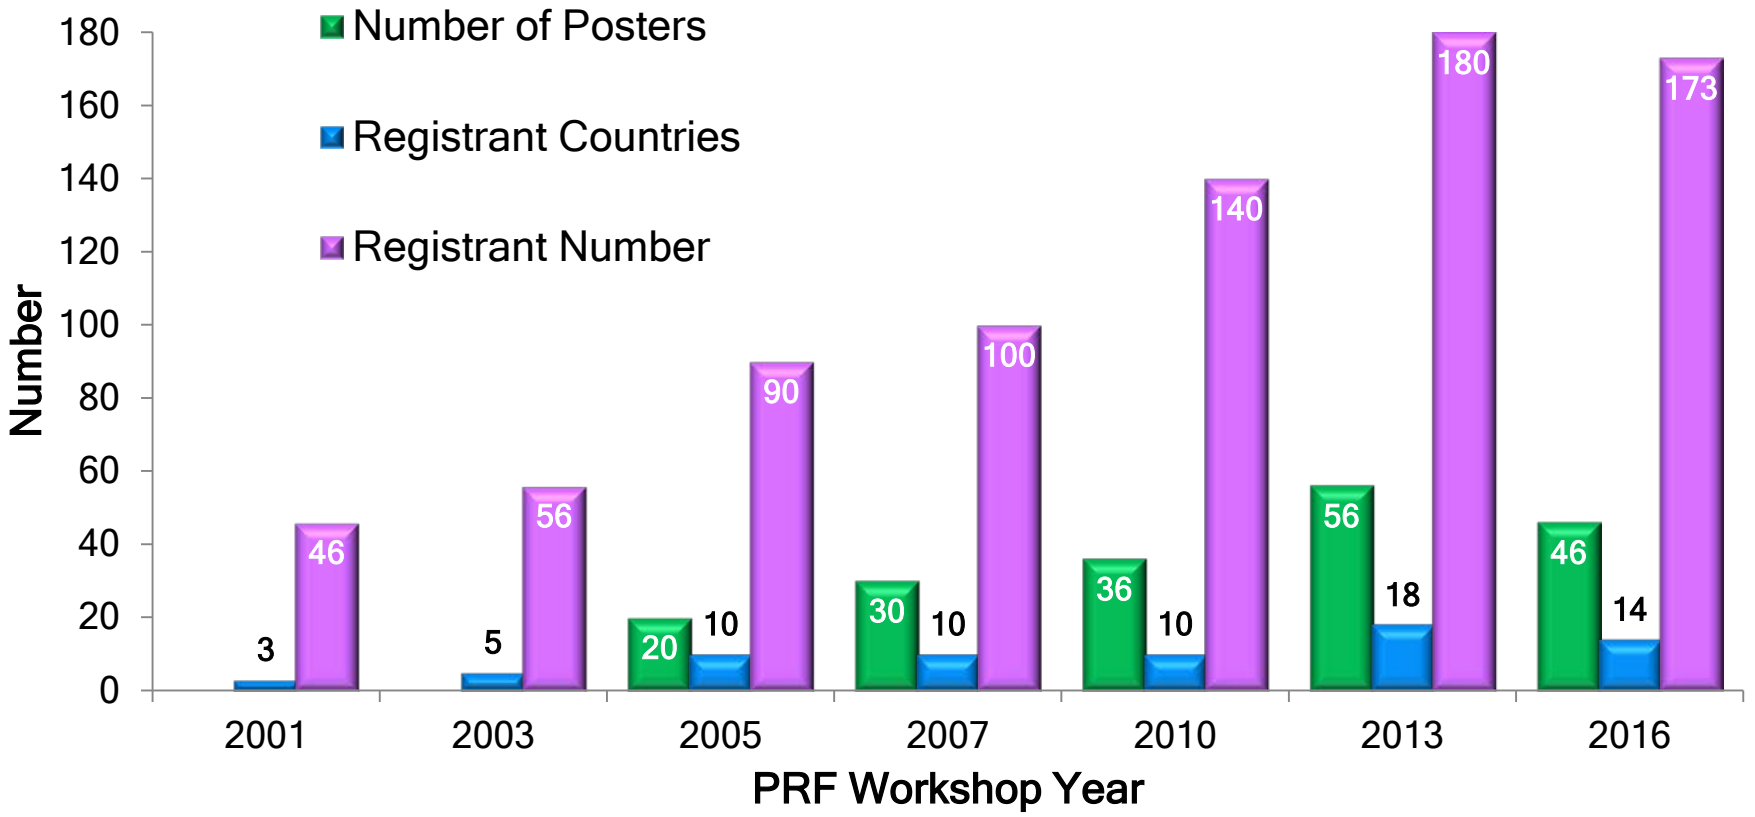
Progeria Research Foundation

Growth of Global Interest In PRF Workshops



Progeria Research Foundation

Subspecialty Scientific Meetings

Small, focused meetings designed to promote and support work in areas of high interest for Progeria

- First Genetics Consortium Meeting – "Searching for the Progeria Gene", August 23, 2002 , Brown University, Providence, RI
- Second Genetics Consortium Meeting – "Post-gene Discovery", July 30, 2003, Bethesda, MD
- Bone Marrow Transplant Meeting – "Forging Ahead by Exploring Potential Treatments", April 25-26, 2004, National Institutes of Health , Bethesda, MD
- New Frontiers in Progeria Research (2012), Boston, MA

Progeria Research Foundation

NIH National Heart, Lung, and Blood Institute

NIH National Human Genome Research Institute

Scientific Publications

As of January 1, 2017:

54 Scientific articles have been published citing PRF Cell & Tissue Bank resources:

- Publication list at www.progeriaresearch.org/cell_tissue_bank

28 Scientific articles have been published citing The PRF Medical & Research Database:

- Publication list at www.progeriaresearch.org/medical_database

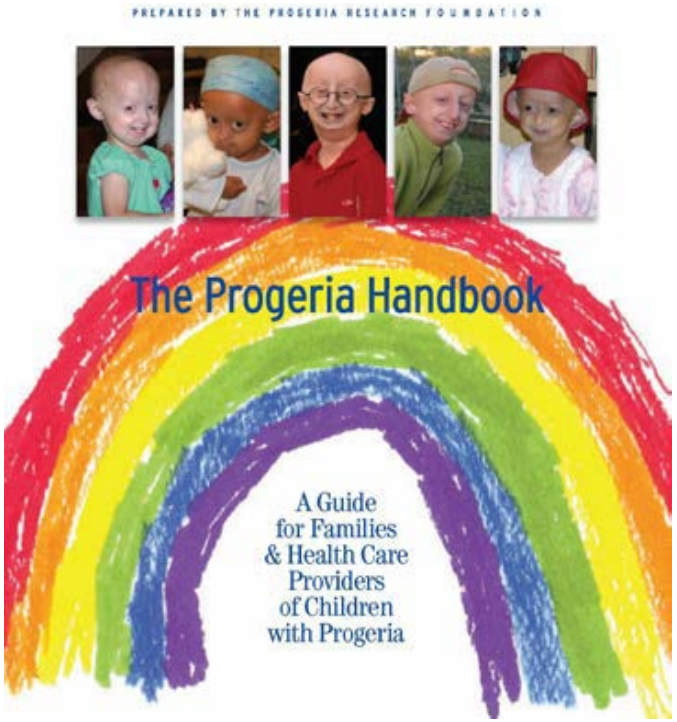
6 Scientific articles have been published from clinical trial data

- See slide #54

Progeria Research Foundation

Progeria Clinical Care Handbook

The Progeria Handbook. A Guide for Families & Health Care Providers of Children with Progeria. *The Progeria Research Foundation.* Leslie B. Gordon (editor) 2010.



- Provided in English, Spanish and Portuguese
- Expert contributors from Boston Children's Hospital
- Number of Progeria Care Handbooks distributed to families of those with Progeria and their care givers: **501**

As of January 1, 2017

Progeria Research Foundation

NIH Natural History Study

- From 2005-2006, PRF participated in an NIH/NHGRI sponsored natural history study that included **15** children with Progeria conducted at the NIH Clinical Research Center.

Goal: to understand the disease processes that drive Progeria.
