

## Corporate membership

## About us

Founded by eminent orthopaedic surgeon Mr Ronald Furlong, Orthopaedic Research UK (ORUK) is a charity dedicated to achieving the long-term vision of **pain-free movement for all**.

We fund essential research, train and educate healthcare providers, and provide support for people affected by musculoskeletal conditions (MSK). These MSK conditions can be painful and disabling, and include life-limiting cancers and chronic but enduring undiagnosed back pain. There is no age limit, children and adults can all be impacted, in fact childhood MSK conditions are some of the most frequently diagnosed.

To date we have awarded over **£10 million** to leading universities, NHS trusts and research centres, and provided high quality education to healthcare professionals - with your support we can fund even more.

## Did you know?

- Pain and functional limitations caused by bone, joint and muscle pain can cause fatigue, depression and social isolation
- There are more than 45,000 people in England alone who rely on prosthetic limbs, with more than 5,000 people each year having new lower limb amputations
- Absenteeism as a result of MSK conditions costs the UK economy an estimated £7 billion a year
- By 2030 40% of the working age population will have a long-term MSK condition
- 1 in 2 women and 1 in 5 men over the age of 50 suffer from osteoporosis
- Back pain is the largest single cause of disability in the UK, with lower back pain alone accounting for 11% of the total disability of the UK population
- Knee and hip replacement surgeries account for over 200,000 surgical procedures in the UK per annum and the numbers continue to grow
