QView™ from AccessData®
Get the fastest, clearest view of your data
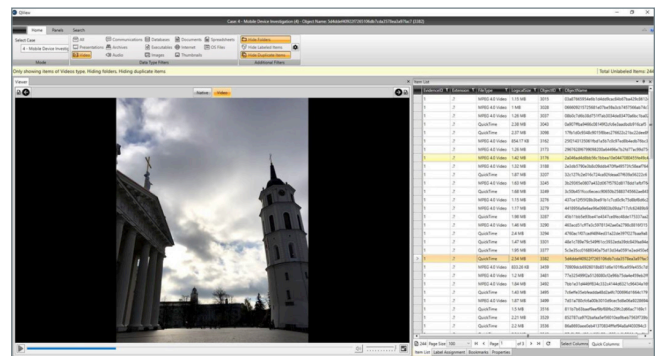

Remarkably easy, accelerated document review

When it comes to document review, time is money … and speed matters. You want the fastest, most flexible review experience, without the lag of web-based rendering. Fast-track your investigations and discovery with rapid document review and untether your vital documents from the cloud. Only QView™ from AccessData® delivers the speed and agility of a desktop app in a standalone viewer that interoperates with your other web-based investigative and discovery tools for unmatched, blazing-fast document review.
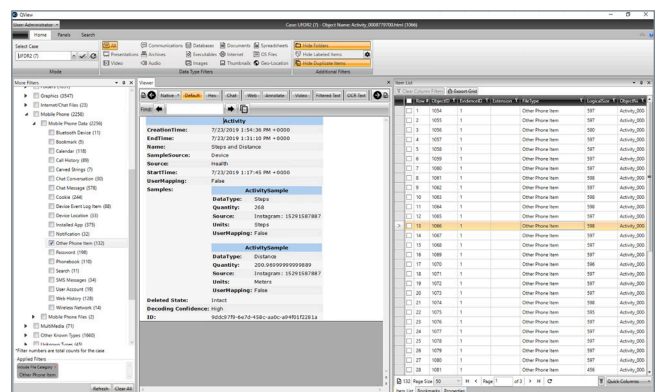

Speed investigation and maximize your resources

An incredibly versatile and intuitive document review tool, QView delivers:

· How you want it, when you want it, simple and secure access to vital documents for review—even offline

· The fastest, most flexible review experience that almost instantly renders documents in native or near-native form

· Intuitive, customizable interface mastered in minutes, even by nontechnical users

· Robust tool set capable of handling any standard review including document navigation, labeling, metadata filtering, keyword search, geolocation, tagging and more

· Mobile data forensic review lets you investigate further into photos, video, SMS, MMS and third-party chat applications

· Collaboration capabilities allow multiple users to work on the same case—or multiple cases—simultaneously

With the right toolset and top speeds, you can maximize the output of every reviewer.

QView eliminates the need for conversion, rendering a wide variety of document types—from simple spreadsheets and PDFs to massive multimedia files and more—with lightning speed.

QView lets users view more and do more with mobile data extractions, such as UFED reports.

Examine Documents from Anywhere

Work online with any file type—or download data directly to your device and review vital documents quickly, simply and securely, without Internet access. Then, easily sync changes when back online, keeping notes, tags and coding intact.

Experience Unmatched Speed, Ease and Utility

Get the fastest, most flexible review, featuring a full complement of tools—QView is more than capable of handling any standard digital investigation.

View Large Files and Multimedia Fast, with Clarity

QView was designed with large files and multimedia in mind. View a 500MB PDF with over 50,000 pages in seconds, or watch a gigabyte movie or multimedia file without waiting to download or stream data.
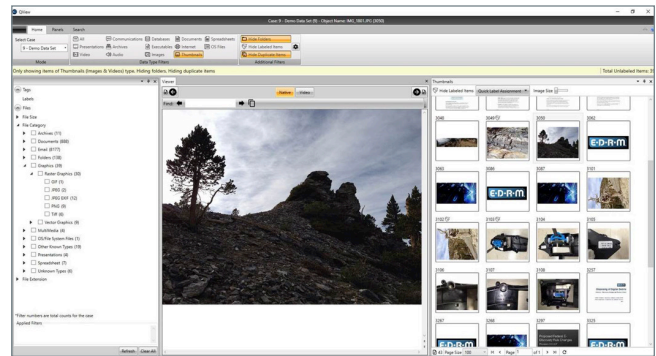

Empower Any Reviewer or Investigator

Even the greenest or most nontechnical investigator can be up and reviewing with minimal training—saving significant time and maximizing the output of your entire team.
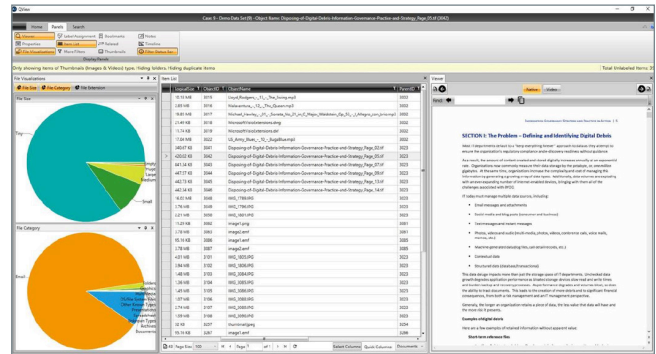

Easily Dig Deeper into Mobile Data

Access more mobile data and investigate further into SMS, MMS and third-party chat applications in UFED reports and from other mobile file extractions with forensically sound review capabilities.
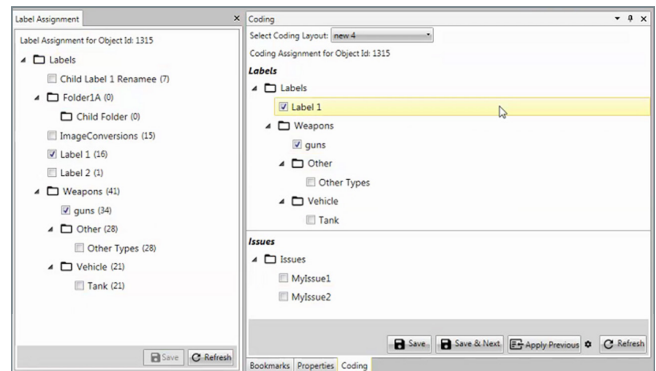

To request a **QView** demo, visit
www.accessdata.com/products-services/qview.

QView lets you locate your files quickly by size, category or extension; thumbnails provide helpful visual clues.

The fully functional grid view of QView enables basic filtering and sorting so you can understand the critical metadata associated with each document. Integrated graphics help you visualize your data.

QView includes a Coding Panel for users who want to tag or code documents directly into QView, which is synced to the database.

ACCESSDATA®

Whether it's for investigation, litigation or compliance, AccessData® offers industry-leading solutions that put the power of forensics in your hands. For over 30 years, AccessData has worked with more than 130,000 clients in law enforcement, government agencies, corporations and law firms around the world to understand and focus on their unique collection-to-analysis needs.
