

## HSG RESEARCH ADVISORY BOARD

The HSG **Research Advisory Board** provides thought leadership on scientific matters, advises on design of trials, reviews protocols, and helps accelerate development of HD treatments that make a difference. Board members are academics with a wide range of backgrounds, who maintain strong connections within academia, industry, foundations, patient advocacy organizations and government.

### Benefits of Using Our Research Advisory Board:

- Holistic assessments of the HD drug development landscape
- Aspects of pre-clinical research planning
- Expert advice on clinical trial design from first-in-human to pivotal trials
- Coordination of scientific, ethical and patient-advisory protocol reviews
- Guidance for working more effectively with FDA on approvals
- In-person support and attendance at FDA meetings
- Advice on selection of steering committee and other trial leaders
