

Our Range of Natural Stones – Red Sandstones

Lazonby Sandstone

Lazonby Red Sandstone is a medium grained sandstone from the Permian age. It is light pink in colour with a high Quartz content giving it a distinct sparkle when viewed in bright conditions. Lazonby Sandstone is hard wearing and has a consistent texture make it ideal for a wide variety of uses.

Corsehill Sandstone

Corsehill Red Sandstone is a fine-grained sandstone from the Triassic age. Its hard-wearing and consistent texture makes it ideal for masonry, walling, cladding and paving. Oxidisation can sometimes occur on the face of the stone causing a dark discolouration.

St Bees Sandstone

St Bees Sandstone is a fine grained and consistently textured stone. Its fine grain and tight bedding make it a highly sought-after stone suitable for masonry, walling and for detailed carving. It is generally red-plum in colour with a variation of darker beds running throughout the stone.

Locharbriggs Sandstone

Locharbriggs Sandstone is a medium grained Permian sandstone with subtle bedding plains throughout. It is a rich red colour with linear black banding. This gives Locharbriggs its distinctive appearance, making it a popular choice for projects all over the UK.

Our Range of Natural Stones – Buff Sandstones

Longridge Sandstone

Longridge Stone (also known as Lower Pendle Sandstone) is a hard-wearing medium to coarse grained millstone grit. It is generally light buff in colour with swirls of golden brown / orange giving it a distinct and varied natural appearance. Oxidisation can sometimes occur on the face of the stone causing a dark discolouration.

Witton Fell Sandstone

Witton Fell is a fine grain buff grit stone from the carboniferous age. It is generally buff in colour with occasional light brown flecks and veins. Its properties make it suitable for fine carvings, masonry, and walling. Oxidisation can sometimes occur on the face of the stone causing a dark discolouration.

Stanton Moor Sandstone

Stanton Moor Sandstone is a fine to medium grained buff sandstone with variations ranging from pink inclusions and beds through to brown veining. The variations within the stone have proven to be popular on large scale developments, and Stanton Moor Sandstone can be found on projects all over the UK.

Scotch Buff Sandstone

Scotch Buff is a Medium grained Carboniferous Westphalian sandstone, Generally Buff in colour with occasional brown bed lines and speckles. Darker buff to almost light orange patches also appear within the stone.

Our Range of Natural Stones – Grey Sandstones

Wattscliffe Sandstone

Wattscliffe Sandstone is a medium grained and uniformly lilac/grey in colour with occasional buff/white intrusions. It is essentially a free stone and therefore almost equally durable in most masonry applications whichever way its natural bed is laid.

Elswick Sandstone

Elswick Sandstone is a fine to medium grained, versatile stone suitable for most applications. The stone is a medium grey with dark linear markings through its face, and due to its hard-wearing nature it is predominantly used for external applications including ashlar, paving and carved features.
