

metroSTOR PTL Outdoor Storage Locker

metroSTOR Outdoor Storage Products

Specified across a broad range of sectors from facilities departments to social housing; metroSTOR PTL, PTM and PTH provide flexible, tough outdoor storage unit systems for equipment and belongings. Neatly styled with custom wall panel and roof type options, metroSTOR Outdoor Storage Units can be specified to complement the surrounding architectural fabric and enable the creation of uniform street furniture across a development.

With a brief to obviate the requirement for traditional costly and difficult to procure purpose-built storage on site, metroSTOR lockers, units and buildings available as efficient, all-inclusive packages; are fast becoming firm favourites for specifiers, housing managers and contactors across the UK.

metroSTOR PTL Outdoor Storage Locker

metroSTOR PTL is a compact, secure locker designed primarily for the residential sector where there is a requirement for the economical storage of buggies, prams and children's toys in confined spaces. The low-profile design enables installation below window height, avoiding the blocking out of natural light from adjacent properties while providing clear lines of sight for the security of users and residents alike.

Unique to metroSTOR PTL in locker type storage is the degree of adjustment in the secure bolt down unit plinth. This design feature enables single or banks of units to be installed in uniform line and level without costly enabling groundworks.

metroSTOR PTL is available with a wide choice of cladding and finishes in the form of coloured options for the steel cladding together with contrasting side infill panels to elevations.

Secure Design
Fully welded steel frame with security fixings ensures possessions secured inside cannot be removed even if panel integrity is compromised by attempted theft.

Ease of Specification
Two unit depths to suit site locations with availability to configure as a bank of storage units.

Customisable Finishes
The availability of laser cut door and panels, coloured steel cladding choices and the option of contrasting side infill panels in timber make for less obtrusive outdoor storage.

Streetscene Ready
Consistent design themes can be achieved along with other metroSTOR products.

User Access Control
metroSTOR PTL is fitted with our modular lock system or customer specific user locking control as required.

Adjustable Base Design
Unique adjustable plinth enables metroSTOR PTL units to be installed in uniform line and level without costly groundworks.

metroSTOR PTL 12 Series Outdoor Storage Locker

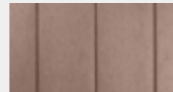

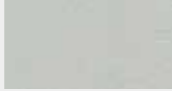

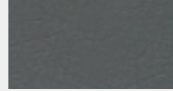

Model:	PTL 12
Storage:	1no. Storage Locker
Depth:	1285mm

Fire Safety

metroSTOR products can be specified to meet relevant fire risk assessment criteria. Our fire retardant options for TGV and sheet type cladding have a Fireboard MgO internal liner with either treated SW timber, HDPE 100% recycled plastic or coated steel panel outer to provide Euro-class A1, UK class 0 reaction to fire. The panels are manufactured from materials of limited combustibility throughout to provide 30 minutes fire resistance to BS 476. Where fire retardant properties are required for an open-spaced cladding type, SE timber plank can be specified with an HR Prof treatment process providing a Euro-class B, UK class 0 Reaction to Fire classification

metroSTOR is the leading outdoor storage system for today's built environment, delivering social, economic and environmental value. Combining superb aesthetics with durability for the toughest environments, metroSTOR offers a configurable, modular product system to comprehensively address the challenges of outdoor storage; from waste and recycling bins, mobility scooters and cycles to household items, site equipment and service plant enclosures.

Mobility Scooters

metroSTOR PSL, PSM and PSH provide space-efficient, mobility scooter storage with user-friendly integral battery charging, making for safer communal areas while helping users to maintain their independence.

Waste & Recycling

metroSTOR PBL, PBM, PBE, PBC and PBH products help control waste-streams with robust enclosures and stores for all standard bin sizes. Their smart appearance and unobtrusive physical profile enable recycling centres to be located in spaces that may not have previously been considered.

Household Items & Site Storage

metroSTOR PTL, PTM and PTH are tough, versatile products providing attractive, secure storage for equipment and bulky items in an unobtrusive design. Highly configurable for capacity, layout, access, security and finishes, the proven modular system makes for ease of specification.

Cycles & Motorcycles

metroSTOR PCL, PCM and PCH for custom cycle parking solutions with the efficiency of modular build from transit shelters to cycle hubs. Stands, racks and carousels can all be specified with a number of options available for roofing, enclosure and layout type, finishes and access control.

Service Plant & Industrial

metroSTOR Custom Build is driven by the inherent design flexibility of our products, working in partnership with client input informing the design process. This enables the development and delivery of effective solutions, achieving a consistent design aesthetic.
