Trubiquity Announces Enhanced Infor Partnership – Adds EDI Cloud Services to Infor ION

Expanding an already strong partnership with Infor in Europe, we are excited to announce cloud-based EDI capabilities through integration with Infor ION. Infor ION is a purpose-built middleware solution that simplifies integration between disparate systems.

Trubiquity's TRUedx cloud-based EDI services, integrated within Infor ION, provides ION customers the ability to exchange data via a vast catalog of trading partners that are mapped to and from standard BOD's (Business Object Documents) such as Service Requests, Purchase Orders, and Requisitions. This new offering also ensures Infor customers will remain compliant with their trading partner EDI requirements by proactively updating the cloud with the latest mandated changes.

Trubiquity announces TRUaras cloud-based file exchange service available for all Aras Innovator PLM users

Trubiquity and Aras, a leading provider of enterprise Product Lifecycle Management (PLM) solutions, announce the availability of TRUaras, a cloud-based secure file exchange service embedded in the Aras Innovator PLM platform.

TRUaras is available free of charge to all companies that run Aras Innovator. It provides an easy and secure means to transfer files and conduct regular data transactions while adding encryption, tracking and traceability. TRUaras affords users the ability to share and exchange large CAD files, technical data packages, manufacturing data, inspection & test results and other intellectual property with the utmost security.

For more detailed information, click here.

TRUcentrix 6.1 includes Managed File Transfer - Supports data exchange & collaboration with customers, suppliers and joint venture partners.

This newest upgrade to TRUcentrix B2B project collaboration and business process automation platform provides the ability to securely exchange data and collaborate with others through-out your global supply chain. When exchanging large and/or sensitive files, TRUcentrix is a safer alternative than uncontrolled FTP environments.

TRUcentrix MFT capabilities include:
- support for large file sizes
- automatic file deletion
- public/private key encryption
- detailed audit trails and,
- real-time status reporting

Trubiquity Expands Capabilites in Electronic Invoicing To Support E-Invoicing Standard ZUGFeRD

Trubiquity is extending its electronic invoicing by going beyond EDI data exchange in accordance with VDA, EDIFACT, and ANSI standards for electronic invoices by offering creation and transmission of invoices in a PDF format. This allows Trubiquity customers to easily provide electronic invoices to Non-EDI partners. Within this expanded offering, Trubiquity provides support for the future e-invoicing standard ZUGFeRD (Central User Guide of the Forum electronic Invoice Germany).

Daimler EDM CAE Forum 2013

Trubiquity representatives Martyn Davies and Christian Dohr attended the Daimler EDM CAE Forum 2013 on July 10th & 11th at the International Congress Center Stuttgart (Germany) as part of the partner community. The Trubiquity team presented solutions for supplier integration, collaboration & OFTP2 exchange which support global product development partnerships by leveraging CAD, PLM and related tools. Further discussions at the stand centered on improving supply chain managed file transfer and collaboration with a focus on automating CAD/PLM files and Meta data B2B workflows.
