# CASE STUDY

SECTOR: Renewable Energy

## Multinational Windfarm Business

CONTRACT: Fabrication and supply of Load Out timbers for wind farm project control unit.

---

TIMESCALES: 10 weeks. Delivered as scheduled

---

Major windfarm project. The contractor required high quality timbers to move a 10,000 ton control centre between transportation barges.

### TIMBER REQUIREMENTS:

---

Aitken and Howard won the tender to supply the following:

- 230mm x 230mm Greenheart sections

---

VALUE ADDED: Sections planed to -1/+1 tolerance with 4 sections bolted together to create a raft unit. A total of 16 raft units were then bolted together to create the completed launch runner.
