COR-TEN®

OUR QUALITY IS YOUR STRENGTH

Kloeckner Metals UK, the largest mill independent multi metal stockholder & distributor in the UK, and a key member of the Klöckner & Co. group, the largest producer independent distributor of steel and metal products in the European and American markets combined, are proud suppliers of COR-TEN® to the MyPod garden project, designed and built by Leeds Metropolitan University.

The weathering characteristics of COR-TEN® steel plate seals the surface against further corrosion once the protective layer or 'patina' has formed.

Glen Metals, part of Kloeckner Metals UK, is the leading nationwide Stockholder of COR-TEN® products. A comprehensive range of sheet and plate is held, in addition, a profiling service is available to produce finished shapes of your choice.

With over 25 years experience of supplying COR-TEN® products to UK industry, we have successfully demonstrated our strong commitment to customer satisfaction, quality and reliability of service. Our extensive processing capabilities, and group resources, enable us to meet all your COR-TEN® requirements.

Please contact Glen Metals and one of our COR-TEN® experts will deal with your enquiry
