Established since 1983 SJ Stanberry & Sons now have a unique company within the construction industry offering a wide and varied range of services. Working closely with my sons, we have developed a strong knowledge base and an invaluable reputation for our concrete flooring, groundworks and portable building services.

Providing our clients with a "One Stop" service, extensive knowledge and skills set we can undertake a project from start to finish allowing us to meet all our client's requirements

Whether we are providing a new or used portable building, rest assured all aspects of your project will benefit from our broad experience in this sector. Having worked with several local authorities, including Leicestershire, Cambridgeshire, Lincolnshire, Suffolk and Norfolk we can provide a full service that is tailored to meet your needs.

In addition to portable buildings, our experience of groundworks and concrete flooring has proved beneficial in providing customers with a wider service, and we have diversified into agricultural, industrial and commercial concrete flooring for many projects ranging from silo bases and shed floors to large service yards, anaerobic digestion tank and bio mass bases.

We offer a professional service when dealing with all our clients and are approachable and versatile. We are committed to ensuring our team remains completely informed and qualified in all areas of work, keeping in line with current legislation for the projects we undertake.

Our services are offered nationwide, including a free site visit and a free, competitive quotation.

Sale or hire, new or used, the customer's choice

SJ Stanberry & Sons offer local authorities, schools and businesses the extra space they need quickly and cost effectively with a new or refurbished portable building. Whether you need to move a building internally or externally, permanently or just a temporary measure, we can offer you a complete service.

During a site visit we discuss your requirements, not only for the building, but also any additional work you may require i.e. foundations, drainage and service connections. This will allow you to plan and budget for the whole project and give you peace of mind knowing that expert help is at hand.

Services include:

- · Sale or hire of new or used portable buildings
- · Refurbishment of existing buildings or disposal of old
- Relocation of a building either internally or to a new site nationwide
- Enabling works include: Foundations, drainage and service connection
- Installation of safety fencing in line with current H&S legislation
- Removal of fences, small trees (and tree lopping) plants and shrubs, sheds etc.
- Play areas cleared and bollard removal
- · Paving, patio's and walkways
- Flat roof repairs or renewals

"Just wanted to say a big thank you to you all for the hard work you put in last week to get the temporaries ready for handover. We caught up with them at Sudbury and when we arrived I really thought that we would have to postpone the handover - then, before my very eyes, while we started at one end it just miraculously happened in front of us. Amazing." Hilary Stearn, Suffolk County Council

Offering a genuine, unique, one stop service

SJ Stanberry & Sons Ltd can transport your portable building, caravan or container to a new location or an internal site re-location and construct the relevant foundations, service ducts, drainage, disconnect and re-connect all necessary services.

A site visit will be arranged with you (at both locations) to enable us to assess the building either in situ or where required, ground conditions, access, etc. We will discuss your exact requirements with you and provide a free, no obligation quote.

We transfer all buildings in line with current transportation regulations, allowing for sufficient notice to the local authorities regarding wide load permits and road closure where applicable.

For your project to proceed smoothly, we will undertake:

- Notification of wide load order (where required)
- Prepare Health & Safety documentation
- Arrange for disconnection of water, electricity and gas (if required)
- Following disconnections, bays are separated, loaded and transported
- The building sections will be re-fixed and ready for use
- · Service reconnections take place
- · Banksmen are used for all vehicular movement

Crane and vehicle operators are fully certified. All service connection certificates are issued once testing is completed.

STEPS, RAMPS & SKIRTS

All DDA compliant to suit customer requirements

We can match steps, ramps and skirts to your existing building ensuring that the overall effect remains aesthetically correct. We stock pre-made, DDA compliant platforms and steps to match and therefore can supply these very quickly. However, we do prefer to assess the site first as undulating site levels have a dramatic effect on the finished design.

Ramps are constructed to ensure there is ample room for wheelchairs, with the correct resting places built in where required. Both ramps and steps have the requisite DDA anti slip and nosing's fitted, and posts can be concreted in place to increase stability.

We can also construct canopies, walkways, and facias to create an attractive view of your building.

"Everything ran smoothly and questions were always answered quickly. From quote to moving classroom was completed quickly and efficiently."

Diane Unwin, Bourne Primary Academy

Working alongside Agricultural Building Construction Ltd, we can provide high-quality agricultural and industrial buildings at an affordable cost combined with a customer service second to none.

From initial site assessment, groundworks and foundations to the delivery and erection of your new building we provide our clients with a fully comprehensive package. We take pride in the efficient delivery of our projects as we proceed from your design to installation whilst still ensuring quality and affordability are met.

Our buildings are used for many purposes, from housing livestock to storing grain in a vermin-free and farm assured conditions and we will obtain guidance on the correct steel framed building to perfectly suit your requirements.

All our works are carried out to the highest of standards with fully trained personnel and fully insured works.

"ABC buildings did the groundwork and erection of a grain store for us in summer 2015. They were very efficient in their organisation from delivery through to the erection and completion of the shed. We are very pleased with the results and would have no hesitations in using them again."

- W Bradshaw & Son

Biomass is fuel that is developed from organic materials, a renewable and sustainable source of energy used to create electricity or other form of power.

When burned, the energy in biomass is released as heat and this is exactly why Volmary (formerly Delamore Young Plants) installed a woodchip burning boiler to generate energy for their plant nursery based in Lincolnshire. We were contracted to install the concrete flooring to allow for the placement of the various components of the boiler.

Anaerobic Digestion is a collection of processes by which microorganisms break down biodegradable material in the absence of oxygen and the process is used to manage waste or to produce fuels. We installed the large circular concrete bases for **Staples of Boston**, **LincoInshire**, one of the largest retail vegetable suppliers in the UK

Tamp, brush or power float finishes

SJ Stanberry and Sons Ltd are your perfect solution for concrete flooring projects – nationwide.

We provide a high-quality service to a wide range of agricultural, commercial and industrial clients around the UK and have done for many years. Our team have industry experience, with some having up to 40 years' knowledge of the concrete construction industry.

Our concrete flooring services provide high quality, durable installations, saving our customers money and giving them access to an investment that can be relied upon for many years.

We have an extensive portfolio of projects that we have worked on over the years, including concrete flooring for Greggs based in Enfield, Next Homeware in Norwich, Asda in Milton Keynes, Logicor in Weybridge, plus many more.

We have also built an excellent track record and reputation for our agricultural concrete flooring services for sheds, aprons, poultry units, stable yards, grain, potato and machinery stores, silos, bio-mass and anaerobic digestion tank bases and even a crocodile pit at Johnsons Farm, Oldhurst!

Our service includes:

- Site clearance and preparation
- Groundworks, foundations and drainage
- Steel reinforcement fixing
- Brush, tamp or power-float finishes
- Screed flooring

- Material and costing advice
- Free site visits and competitive quotations
- Professional, dedicated and reliable service
- Nationwide coverage

I thought the whole operation from the quote to the concrete slab-laying was very efficient. The standard of work was extremely high and I was really happy dealing with Damion and the rest of the team. I would definitely use Stanberry's again."

- Gavin Lane - RWC Tittleshall Ltd

Good plant, good men, competitive prices - worked to date given. Will continue to use on major concrete work. Excellent float finish, good methods, obliging labour force. Most important they work to date given"

- D W Hicks Building Co Ltd

"We are still loving our concrete yard, it has made such a difference to our quality of life."

- W. Searby & Sons
