TORO SHELTERS - A TRUSTED PARTNER

We provide you with an affordable means of protecting your salt reserves. Our salt barns stand across the length and breadth of the UK, from Central London to the Highlands of Scotland.

Temporary or Permanent Solutions

- If your organisation is undecided on the lifecycle of the project, our structures offer the perfect solution as they can be **re-located, re-sold, stored** and even used for a new business purpose.
- We offer **flexibility of design**, size and fabric colour in accordance with your requisites.

Rapid Design, Fabrication and Install

- Our experienced design team can **customise a solution** for you in a matter of days.
- **Fabrication, delivery and installation** can be achieved in a **fraction of the time** compared to conventional structures.

Meeting Environmental Objectives

- Whether you're worried about environmental regulation or the safety of your employees, Toro offer an efficient and durable proposition of storing de-icing salt reserves safely.
- Toro Shelters are designed to meet **snow and wind loads** at the specified installation location.

Quality & Expertise

- Toro salt barns are **certified to CE mark standards**.
- Steel frame is hot galvanised according to SIST EN ISO 1461:2009
- Flame retardant fabric.
- Installed by a **professional, experienced team**.
- Rigorous adherence to Health & Safety policy.

Cost-Effective

- **Minimal foundation** requirement compared to other structures.
- Our **galvanised steel framework** allows the structure to be anchored to a simple reinforced concrete slab or the existing ground conditions, if suitable.
- Protecting your salt supplies reduces the risk of losing up to 20% of its volume per year and reduces caking.
- Our fabric allows the transmission of natural light, saving you money on interior lighting during daylight hours.
- Low annual maintenance cost.
- Repairs can be rapidly assessed and carried out by your own employees.

TORO FABRIC STRUCTURE RANGE

Arc Shelter

Round Shelter

Rapid Shelter

Gable Shelter

Dutch Barn

TORO SHELTERS ARE VERSATILE AND HAVE MANY DIFFERENT ANCHORING SOLUTIONS

CONCRETE SLAB

Toro Shelters can be anchored to a new or existing slab providing it is of sufficient depth and suitable strength.

HARDCORE & BARE EARTH

Toro Shelters are anchored in position with our ground anchor system. These penetrate deep into the earth pinning the structure to the ground.

SHIPPING CONTAINERS

Shipping containers are built to a global standard. Toro Shelters are able to use the standard corner castings to lock the structure in place.

JACKS & WHEELS

Toro Shelters specialise in mobile structures. Speak to one of our sales team about your requirements.

RAILS

Toro Shelters can utilise rails to provide a guided path along which the structure can be mobilised.

INTER-LOCKING CONCRETE BLOCKS

Our blocks are quick and easy to install and form an ideal base on which to mount a shelter. These are especially suited for salt barns and bulk stores.

FLAT-PACKED MODULAR STRUCTURES

High quality and robust structures that can be configured to meet a variety of purposes such as offices, workshops and welfare blocks.
