## TESTIMONIAL

“Automodular Corporation was expanding its Oakville automotive plant operations by staffing up its 2nd plant facility on Speers Road in Oakville. I was given the daunting task of having to recruit ten (10) new salaried positions and have these new staff members in place before the new plant facility began full operations on January.

Due to the significant time constraints, combined with the fact that my staff was busy in maintaining the daily operations of the main plant and its 350 hourly associates, I decided to utilize the services of Adventis Personnel Inc. located here in Oakville to assist in overseeing the recruiting of these 10 salaried positions. I met with Paul Schell, the Vice President of Adventis, and some of his senior staff.

Paul, due to his previous Ford and MSXI experience running their Master Vendor Program, was able to put together a solid game plan to search out the labour market for the variety of positions that had to be filled and to fairly manage the other staffing companies. Aside from needing both production and material supervisors, I needed to recruit three (3) Engineering Change Coordinators as well as Inventory Control and Logistics Manager along with a Production Shift Superintendent. Every Friday morning, Paul and his recruiters would come on site and provide a weekly update of how they were progressing in their recruiting activities. I am happy to say that Adventis Personnel was able to directly fill 9 out of the 10 open salaried positions, both on schedule and within budget, with high caliber candidates and oversaw the other placement as well processed from the newspaper advertisements.

If you are looking for a highly focused and very professional recruiting team, I would highly recommend Paul Schell and his Team at Adventis.”

Dennis Barber  
Human Resources Manager  
Automodular Corporation - Oakville
