# PRODUCT RANGE

SELF-ADHESIVE JOINTING TAPE	04
SEAMING TAPE AND ADHESIVE	05
DOUBLE SIDED PERM / PEEL TAPE	06
EXHIBITION CARPET TAPE	07

## SELF-ADHESIVE JOINTING TAPE

Our Jointing Tapes are a perfect tape for Artificial Grass installation. When connecting both parts of the Artificial Grass you are able to roll out the tape underneath, removing the backing paper to reveal high quality adhesive to secure the grass. This eliminates the mess of glues or other adhesives and ensures ease of application.

We offer 2 jointing tapes

### 910 - Self-Adhesive Jointing Tape

Our most popular jointing tape, ease of use for most artificial grass installations whether its domestic, retail or DIY. It has fantastic temperature and UV resistance and can be used at very low temperature. Great adhesive to a wide range of surfaces.

- Green backing non-woven fabric 85 gsm thick
- High tack adhesive system
- Can be used indoors and outdoors
- 150mm x 5m, 150mm x 10m, 150mm x 20m

### 911 - Self-Adhesive Jointing Tape

A foil faced aluminium, coated with an aggressive adhesive, this jointing tape is ideal for applications when the under surface is very uneven, as this is a 1.5mm thick tape it can flow into the surface to create an extra strong bond. It has fantastic temperature and UV resistance and can be used at very low temperature. Great adhesion to a wide range of surfaces and this tape is moisture resistant.

- 1.5mm thick foil faced aluminium
- High tack adhesive system
- Can be used indoors and outdoors
- 150mm x 10m, 150mm x 5m

# SEAMING TAPE AND ADHESIVE

## 912 - Seaming Tape and Adhesive

Our seaming tape is a fabric / polyethylene film laminate. It consists of a non-woven white polyester on the side where the adhesive is applied to when seam jointing, on the other side it has a green polyethylene film to prevent the penetration of adhesive through onto the under surface. This also prevents any moisture ingress from the base of the seam tape.

- 600 Micron (change from the current 500 GSM)
- Soft fabric on the white side to allow the adhesive to bond to
- Can be used indoors and outdoors
- 200mm x 100m, 200mm x 200m, 200mm x 300m and other sizes available upon request

## 913 - Adhesive Sealant

Our 913 green sealant is ideal for application where a quick bond is required and the requirement for a tape is not needed. Our green sealant will bond and will set quickly (within 30 minutes) of application.

- Green sealant (Clear or other colours available upon request)
- Permanent adhesive
- Can be used indoors
- 310ml tubes

## DOUBLE SIDED PERM / PEEL TAPE

### 901 - Double Sided – Perm – Peel

Our 901 is our popular cloth tape which has a high tack permanent adhesive one side (closed side) and a removable adhesive the other (open side). Ideal for temporary installations where a tape is needed to hold the artificial grass in place and later be removed from the surfaces and leave no adhesive residue, depending upon the surface.

- High tack permanent adhesive (closed side) and a removable adhesive (open side).
- Can be used indoors and outdoors
- 50mm x 50m (wider widths also available from 20mm up to 750mm wide)

Add your company logo and own branding to these products

# EXHIBITION CARPET TAPE

## 4109 - Exhibition Carpet Tape

We are the UK's largest supplier of the NEC (National Exhibition Centre) approved carpet tape with our 4109. This tape was specifically designed for temporary carpet installations direct to exhibition hall floors. It is easily peeled off from the carpet backing and floor substrates when required, without leaving any residue at all on most surfaces, which is a critical factor for this application.

The open side is removable and the closed side which is permanent will bond to the carpet or artificial grass.

- Permanent adhesive (closed side) and a removable adhesive (open side).
- Can be used indoors
- 50mm x 50m (other sizes available upon request)

Add your company logo and own branding to these products
