

Description

Commissioned by a wide range of sports users, this full-face version of the Gecko Marine Safety Helmet is suitable for protection against extreme weather conditions and small fast craft.

Design

Designed to give the most protection of all the marine safety helmets.

The Full Face is the number one choice for PWC, giving motorcycle standard level protection with the benefits of being designed to get wet without compromise.

The helmet still incorporates the high line at the rear to allow the user to wear buoyancy aids without restricting movement
