

PARTS

QUALITY COMPONENTS

Durability

We operated our own fleet of sweepers for many years, so naturally we are extremely in-tune with our customers' needs. We manufacture sweeper components to last the longest time possible. Every attempt is made to get the maximum life span for each part, helping our customers get exactly what they need: reliable machines.

Thicker Wear Parts

Wear parts, by their very nature, require replacing the most often. Simply increasing the thickness of these parts means that they last longer. Less time in the workshop means more time on the road, so choosing our wear parts is the right decision.

Lower Running Costs

We listen to our customers and we know that their number one objective is lower running costs. Our parts and support services enable you to get just that, making us the right partner for your business.

FRIENDLY SERVICE

Professional Staff

Friendly and professional staff are the key to any business and we pride ourselves on exactly that. Passionate people work for Stock Sweepers and we aim to please in a friendly and professional way, every time.

Technical Support

Having run our own fleet of sweepers for many years, we have expertise with many different kinds of sweeper. Our technical team can troubleshoot problems with you and advise on the best course of action when ever you need it - we are happy to help.

Parts

We have a fully-stocked warehouse based in the UK. 95% of our sweeper spares are kept in stock and are available in mainland UK on a next working day delivery.

Our parts department supplies parts for most brands of sweepers. We supply internationally to over 20 countries around the world.
