**WASHING FOR A GREENER WORLD HS-6110** 

HS SERIES WASHER EXTRACTORS

LAUNDRY EQUIPMENT

# HS SERIES WASHER EXTRACTORS

# **WASHING FOR A GREENER WORLD**

# WASHING SAVINGS

## **DURABILITY**

The sturdy build of Girbau washing machines means:

- Girbau washing machines have a long working life and are virtually maintenance-free
- Fabric lasts longer thanks to the careful treatment it receives during the washing process and the Care Touch Drum system.

### **PRODUCTIVITY**

It is possible to set each washing parameter to suit the precise needs of each load (thereby saving time). This, combined with the stability of the process, which prevents unplanned stoppages, significantly increases productivity.

### WATER AND ENERGY CONSUMPTION

Features like Aquamixer and Aquafall ensure maximum performance in washes with low water levels, minimising the water and power used.

### SAFETY

Girbau washing machines have double safety features. The machine only starts up after checking that the door is closed and locked. In each washing cycle the system checks the dual status (open/closed) of the safety controls.

### **EASE OF USE**

The machine is simple, intuitive and ergonomic both to use and to maintain.

HS Series washing machines and their controls can adapt to suit all kinds of business and laundering needs.

# TAKING CARE OF THE FABRIC, TAKING CARE OF THE SKIN

For generations our mothers and grandmothers washed their linen in rivers or wash houses.

Girbau keeps up the philosophy and the wisdom of these generations: washing thoroughly, but with the care of someone who values every garment.

- + DURABILITY
- + SILENCE
- ELECTRIC CONSUMPTION

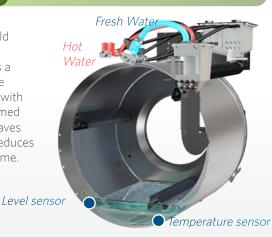

Girbau's exclusive control and communication system linking the inverter, motor and microprocessor ensures that the whole assembly is properly balanced and has a longer life. GDRIVE makes it possible to control the speed, correct imbalances and reduce noise (noise level below 70dB), vibration and component fatigue.

- TEMPERATURE ACCURACY
- + FASTER CYCLE
  - WATER AND ENERGY

A hot and cold water mixer that achieves a highly precise temperature with the programmed water level saves energy and reduces wash cycle time.

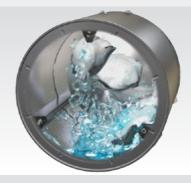

**OPTIONS FOR HEATING** 

Electric Steam No heating (outside hot water feed)

- + MECHANICAL ACTION
- + FASTER CYCLE
  - WATER

Aquafall is the result of a study of the movement of water inside the drum. With a minimum level of water, and with recirculation through perforated blades, it provides a cascade flow, increases the washing action, reduces cycle time and saves water.

# SOFT-MOUNT TECHNOLOGY

- + FAST, FLEXIBLE INSTALLATION
- RESIDUAL MOISTURE

### • EFFICIENT SPINNING

Girbau HS Series washing machines work at high spin speeds, up to 400G (depending on the model), extracting water efficiently (residual moisture of less than 50% depending on the fabric) and achieving energy savings on the subsequent drying process.

### SPINNING MANAGEMENT

With smaller loads than usual, the system for detecting and handling imbalances ensures a high spinning success rate without harming the mechanism.

### • EASY INSTALLATION

The Multi Directional Spring system absorbs vibration and noise so that no ground anchoring is required, making installation quick and easy.

### • TOUGH DESIGN

The design is based on a calculation of structural tensions to avoid critical points and achieve a highly robust machine with a long working life, even when working under the most demanding conditions.

Multi Directional Springs

Spinning force 400G

### **WATERTIGHTNESS**

- **MECHANICS:** Watertightness is assured by the double radial and axial seal with a large drainage chamber built in to stop any water leaking into the gearbox.
- DOOR: This uses an adjustable EPDM gasket system.
- **DRAINAGE:** This ensures fast draining of water from the bath, as well as preventing blockages due to solid particles and resisting today's chemicals, making it the most reliable on the market.

With the option of separate double water

(only on Inteli Control models).

RESIDUAL MOISTURE

The system of pressed holes without sharp edges ensures that the linen is treated delicately and aids the evacuation of the water during the final spin, as well as ensuring fabrics are treated carefully.

This achieves low residual moisture levels and prolongs the useful life of fabrics.

The drum is made from AISI-304L stainless steel with a Viton seal, **resistant to washing processes using ozone**.

### **VERSATILE DOSING**

All models feature **internal and external dosing** systems. Chemicals are always diluted beforehand in the collector to avoid damaging fabrics by direct contact. Inteli Control handles **up to 12 separate dosing signals** of adjustable length for external equipment. It also deals with communication with smart external dosing equipment.

Internal dosing HS-6008 / 6023

Internal dosing HS-6040 / 6110

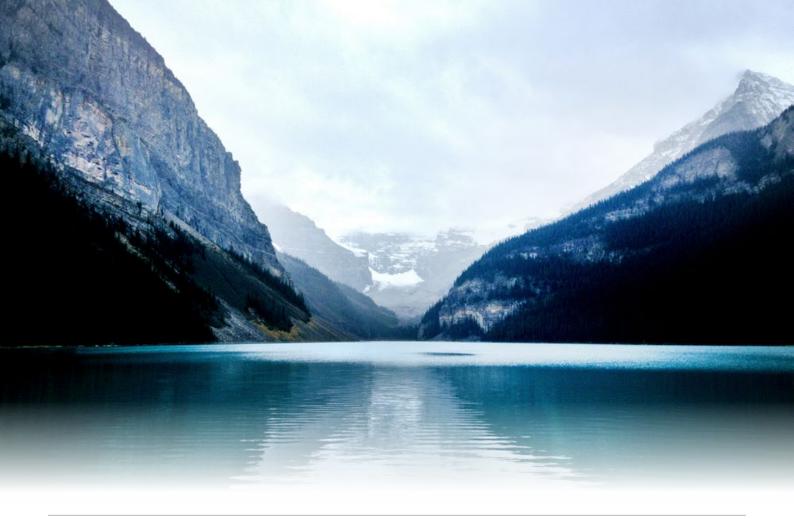

External dosing and collector HS-6008 / 6110

- WATER

CHEMICALS

This feature **automatically adjusts** water consumption and dosing time proportionally according to the load weight, fabric and programme selected. This saves water, energy and chemicals in every process, without the operator needing to do anything.

# **WATER RECOVERY SYSTEMS**

A water re-use circuit cuts consumption by up to 50% depending on recoverable rinses. This water is recovered for the prewash and wash phases.

### **ENERGY SAVING**

Good management of the energy and time invested in the process have a direct impact on the profitability of your business. Girbau know-how has enabled us to **develop** new equipment with a view to energy efficiency, reducing water consumption by 59% and time taken by 23%.

Serie 2

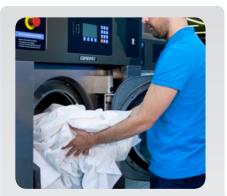

Serie 3

The ECO60ew programme currently gives very low water consumption rates (approximately 7 litres per kg depending on model) together with high wash quality.

HS series models stand out as the most efficient according to WTL standards.

The structure is designed according to ergonomic **criteria to make the operator's job easier.** 

- The ratio between the diameter and depth of the drum is intended to make loading and unloading the washing machines easier.
- Large-diameter opening for loading.
- Rounded corners on the external casing to minimise impacts.
- Convenient access to all components of the machine to speed up maintenance tasks.
  Easy to operate door closing with minimum effort.

# **ERGONOMICS AND ASSISTANCE FOR OPERATORS**

During loading the linen is compacted using water so as to minimise the work for the operator in completing loading. The water is used for the wash cycle.

While unloading with the door open the drum can be rotated alternatively both ways to untangle and free linen after the final spin.

(Available on HS-6040 / 6057 / 6110)

A tilting system angles the machine back to make loading easier and forwards during unloading. Features EASY LOAD and, as an option, remote control.

(Available on HS-6040 / 6057 / 6110)

# INTUITIVE, VERSATILE TECHNOLOGY

products.

## • 4 specific **configurable** programs for Vended Laundries.

- Up to 6 phases per program.
- 4 water levels can be selected.
- Connection to an external dosing system.
- Adjustable length of dosing signal.
- Simultaneous dosing of two products.
- Failure check and alarm messages. Test program.
- Individual cycle counter.
- Price programming per time band and program.

## **OPL**

### **LOGI PRO CONTROL**

### **LOGI CONTROL**

### 25 configurable programs

- Up to 11 phases per program.
- 6 water levels can be selected.
- Connection to an external dosing system.
- Adjustable length of dosing signal.
- Simultaneous dosing of two products.
- Failure check and alarm messages. Test program.
- Just in Load water and detergent consumption proportional to load weight.
- Rinse Hold crease-guard stop mode.
- Start-up at the desired time.
- Gradual cooling.
- Check operating parameters of the program under way.

## 8 configurable programs

- Up to 9 phases per program.
- 4 water levels can be selected.
- Connection to an external dosing system.
- Failure check and alarm messages. Test program.
- Rinse Hold crease-guard stop mode (in final phase only).
- Start-up at the desired time.
- Gradual cooling (in wash phase only).

### **VENDED PAYMENT SYSTEMS**

Payment with tokens, coins, vending or button systems.

### **INTELI CONTROL**

- 99 configurable programs. 20 standard + 79 free.
- Unlimited number of phases.
- 6 water levels can be selected.
- Connection to an external dosing system.
- Adjustable length of dosing signal
- Simultaneous dosing of four products.
- Failure check and alarm messages. Test program.
- Option of manually adjusting parameters during washing.
- Smart Load. Automatic load detection and proportional consumption of water and/or detergent.
- Programmable gradual heating and cooling.
- Rinse Hold crease-guard mode stop.
- Start-up at the desired time.
- Individual total cycle and program counter.
- Programmable wash parameters.

Wash speed.

Spin speed.

Spin time in seconds or minutes.

5 levels of adjustable mechanical action.

- Memory card.
- IMTX

### **IMTX**

Inteli Manager Tool eXpert Software and Hardware to control wash programmes for every need and every customer by computer.

The programmes are stored on the computer and/or on the INTELI memory card, making it quick and easy to transfer information to washing machines.
