FREESTOR COMPONENTS

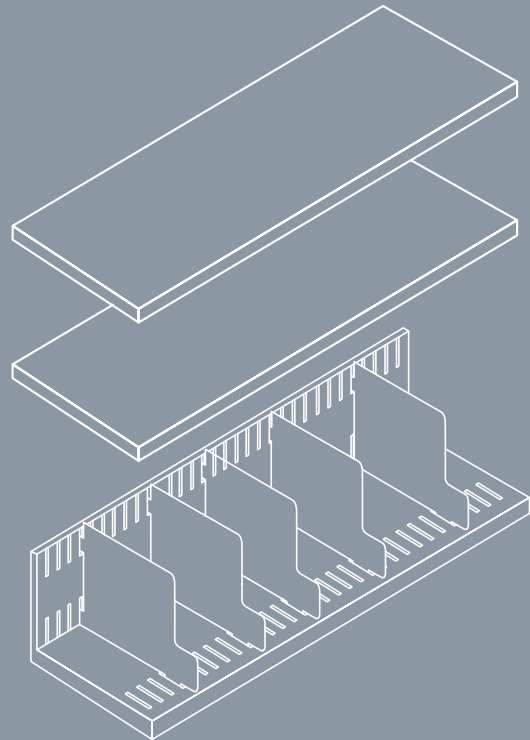

Each Freestor hinged door has a selection of compatible components which help organise your office filing/ storage and equipment. Components can be mixed and matched to increase flexibility. Use the guides to the right to work

out which selection of components fit in your chosen storage. For advice or a full filing assessment, please call our expert survey analysts on 01274 706206.

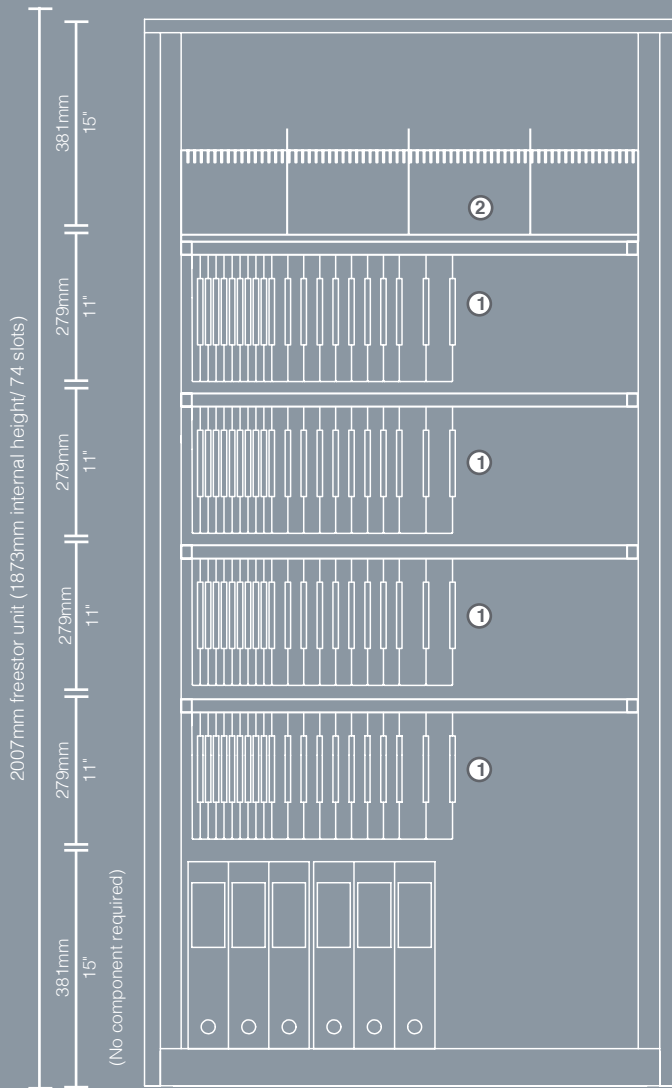

STEP BY STEP GUIDE TO WORKING OUT THE CORRECT COMPONENTS.

1. Use the internal height measurement guide to get the internal height of the chosen hinged door storage unit.
2. Using either mms or 1 inch slots as a measurement and the component guide, calculate which combination of components can fit in the storage.
3. Repeat with any additional storage unit.
4. Order the correct components and accessories if desired. Each component's width needs to match the width of the chosen hinged door unit.

EXAMPLE

STORAGE EXAMPLE:

Storage chosen: 2007mm (h) x 1000mm (w) hinged door storage -

74" slots.

Components chosen:

1. Lateral rail for AZV mixed files - 11" slots.
2. Slotted shelf - 15" slots.

These components together fit into the 2007mm/ 74" storage.

TIPS

The bottom of the storage unit can be used as a shelf if desired. If used remember to leave adequate space before inserting the next component. Any surplus internal space can be distributed throughout the unit.
