

# Eco Radial Flowgrid

High Quality, Accurate and Competitively Priced Aluminium Flowgrid - Made in the UK

Designed for accurate control and measurement of air in the HVAC and other industries. They generate an averaged signal for both the total and sub-static pressures along the length of each leg to generate a differential pressure signal that directly relates to volume flow. Providing accurate and reliable outputs at a highly competitive price.

- Brand new economically priced product.
- Off the shelf item in 150, 160, 200, 250, 300, 315, 400 and 560mm diameters.
- Can be supplied to suit any circular duct size between 150mm and 600mm diameter.
- Designed for use on HVAC projects for accurate control and measurement of airflow.
- Logarithmic measurement positions for maximum accuracy.
- Lightweight aluminium construction.
- Easy to install and maintain.
- Can be supplied in duct within flange duct.
- Can be supplied with aluminium honeycomb flow straightener.
