Heavy Duty Vibrational Shaker

Automix 400

The Automix 400 is a brand new shaker designed for the mid range market by Merris and follows a long tradition of solid reliable products. The New Automix 400 incorporates a number of new features that provide for efficient, quiet and safe operations in any mixing application. Features now common on all new Automix shakers such as enclosed leadscrews protected from spills, enhancing the lifetime of the product as it ensures the leadscrews are always free from dirt. A large opening door that can be hinged left or right to suit your shop environment or production site. New roller wheels mean very easy access that allows for machine to be moved in/out of position easily and repositioned for maintenance. The floor base of the machine is also designed to allow a pallet truck underneath for ease of moving from warehouse to shop and even allows for possibility of moving machine without a pallet. Neat front step for loading and unloading your cans/pails of materials.

The New Electrical system is now incorporated across the range and proven reliability over the last 10 years of use. We have standardised common parts to reduce inventory for you as our customer thereby simplifying stock holding and for simplicity in servicing. You learn one system and same for all products. Also, the reliability is that good you can forget about expensive PCB cards too replace faulty boards as that does not feature on our new product range!

Heavy Duty Vibrational Shaker
