

# T500W v. 2.00 SOFTWARE

## Description

T500W is a user friendly Windows ® based marking program for the column-frame, integrable and portable serie UC500 (separate or integrated) machines. It enables to secure, automate and simplify to the maximum the user work.

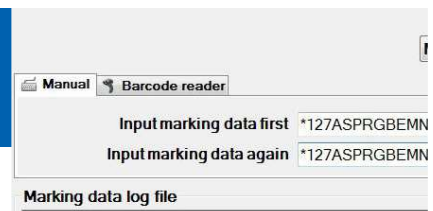

## New interface

- **Visual comfort**, quick start and time saving when creating your marking files.
- **Flexibility** in data entry: manual entry, import from barcode reader, single (serial n#, V.I.N. ...) or multiple data : as simple as possible interface.
- **Marking preview**: Edit directly on the screen with your mouse, add a picture of your part in the background, use the multiple selection, the alignment tools.

Easy to use

- Your benefits
- Simple operation for any operator
  - Secure marking
  - Perfect marks in reduced set-up time

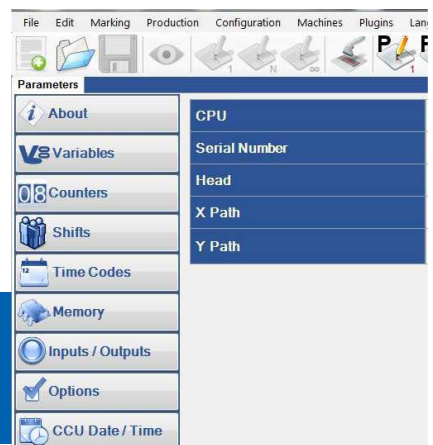

Unique data interface

## Production features

- **Production mode**: marking of small and medium series with automatic search of the text to be marked in your databases.
- **Advanced merge features**: Ability to call on data from multiple databases in merge mode.
- **Multi-file management**: Programming of a file while marking another file.
- **Marking history**: Generates and saves automatically the summary of all the markings done in CSV or ASCII format.

- Your benefits
- Automate the marking cycle
  - Increase productivity
  - Better traceability of your parts and equipment

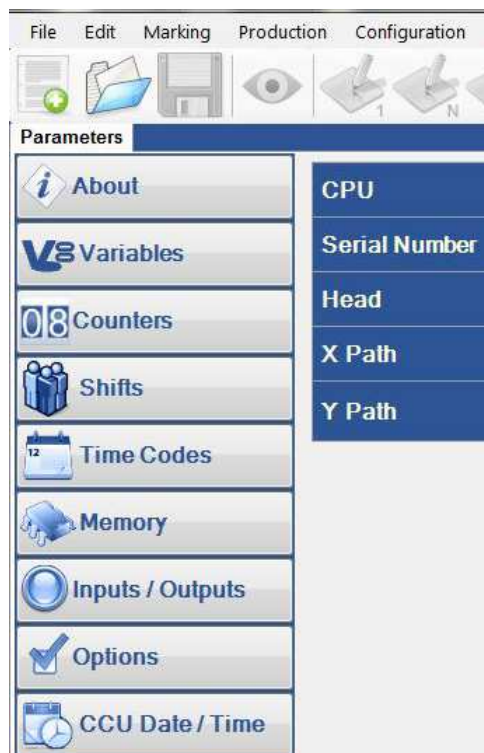

Traceability features  
(counters, dates, shifts...)

## Technical information

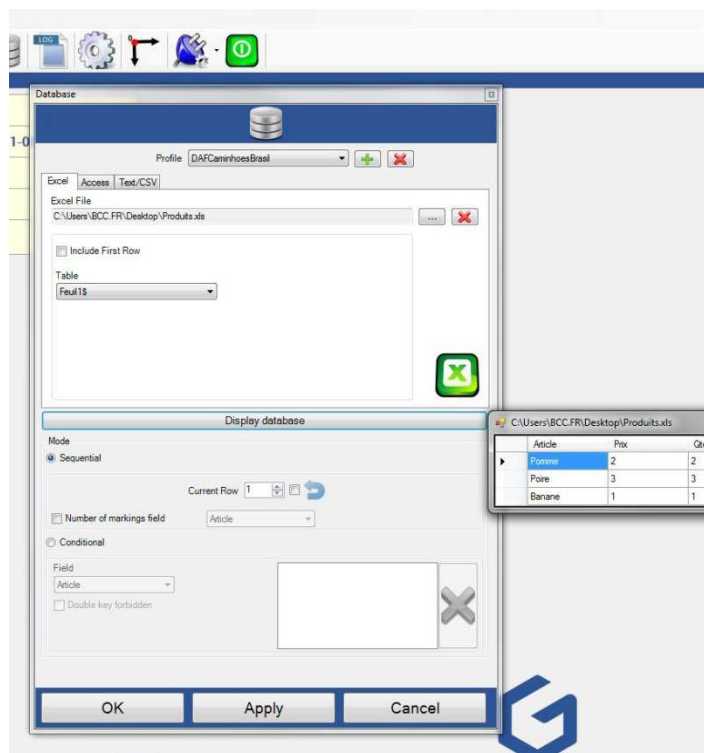

- Communication via RS232 and ethernet.
- Safe software use with protection key (USB or parallel).
- Compatibility with all later Windows® XP versions (included).
