

Mid Floor Gondola

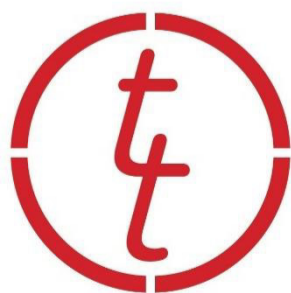

The Mid Floor Gondola is a versatile double-sided shelving unit containing 8 reversible shelves for maximising book display. These shelves can be positioned at various heights within the gondola, providing perfect opportunities for face-on displays and to promote books and reading.

Each Mid Floor unit is fully mobile and can be configured with other units to create shelving which adapts to local need and the library interior space.

Lockable castors secure the units safely in their desired positions. The Gondola can be supplied with additional end bookcases to increase shelf capacity and display areas, offering an exciting canvas for book promotions.

Graphic end panels are also available along with bay and shelf guiding to suit individual requirements and provide interest in your library.

All our Library Furniture is designed & manufactured to conform to BS5459 & BS7176

Mid Floor Gondola Base
