

Just about four years ago I started at Borders College on a 1 day a week course in the access department. I am now an HNC Student studying travel and tourism, and have been VP for Education for the past 2 years. I never ever thought 1 day I could become Student President, as I have a real passion for the Students Association.

### **Education**

With me being the VP for Education the last couple of years I want to further develop the Student Experience Committee and find ways for the Class Reps and Leads Reps to be able to meet up. This will give lead reps more of an incentive to get involved and help little niggles that class reps are having without having to take them to the committee stage.

### **Student Poverty**

I would like to see BCSA still tackle this problem and carry on with our partnership with Asda. I would also like to work out a way that we can team up with an outside foodbank so we can refer students direct for food parcels when they need it.

### **Inclusion**

Over the last couple of years here at College, I have been lucky enough to work with some amazing people over the 4 campuses. All students across our campuses deserve to be treated as equal and have their voice heard as every other. I promise this continues with running events and visiting as much as possible.

**Please vote for me to be your next Student President**
