

Do You Need a Desktop OR A Remote Auto Tuner?

LDG

A LONG COAX RUN CAN BE SURPRISINGLY LOSSY, ESPECIALLY WHEN YOU USE YOUR TUNER TO MANAGE A HIGH SWR. LDG MAKES REMOTE TUNERS THAT ELIMINATE MOST OR ALL OF THAT LOSS BY MATCHING AT OR NEAR THE ANTENNA'S FEED POINT.

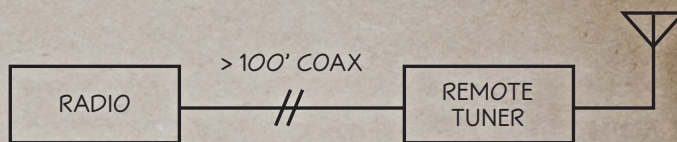

1. PUT UP YOUR ANTENNA, UP TO 10:1 SWR
2. CHOOSE AN LDG DESKTOP TUNER FOR LESS THAN 100 FEET OF COAX

OR CHOOSE AN LDG REMOTE TUNER FOR MORE THAN 100 FEET OF COAX.

+

3. DELIVER MAXIMUM POWER TO YOUR ANTENNA FOR MAXIMUM ON-THE-AIR FUN!

FROM THE 2005 ARRL HANDBOOK
FIGURES 21.4 AND 21.5

100 FEET RG-8 COAX, 30MHz, 100 WATTS,
