

## Pressure Vessels

### Tanks and Storage Vessels

SILOTANK manufactures a range of GRP Pressure Vessels.

### Design

Our in-house design department and external engineers specialises in pressurised equipment. With the expertise in various special materials, our design engineers are able to respond very quickly to customer requirements and offer the best solutions. Silotank have the ability to construct, design and weld our products to meet exact client specifications.

A large part of the delivered units are made with special materials and Silotank also have an advanced knowledge of manufacturing equipment in the GRP Pressure Vessel.

### Maintenance

Silotank manufacture all vessels keeping in mind the end user and operational life of the vessel. All vessels need to be inspected at regular intervals as per Silotank maintenance and installation manuals. Further guidance can be sought from other documents including the PM75 and PM86 documents issued by the UK Health and Safety executive and the IPC Guidance notes for Storage and Transfer of Materials by the Irish EPA. These will give guidance on regular maintenance and also guidance on key points when selecting the correct tanks for chemical storage and standards to be adhered to.
