

P604 Performance Evaluation, Management of LEV

ADVANCED PROFICIENCY MODULE

This new **ADVANCED LEV Course** is ideally designed to add to the knowledge and expertise of Engineers and others who may have already completed the **P601, P602** or equivalent module(s)

The **Tutor** on this highly inter-active course is **Bill Cassells**. Those who have attended Oxyl8 P601 or P602 courses will know that Bill brings a fresh approach to the subject together with his extensive knowledge of all things LEV—all of which is delivered in his own lively, supportive and informal style.

The course is particularly suited to LEV topic specialists, Health and Safety or Occupational Hygiene professionals, Managers, Supervisors and Building Services engineers

This is a 4 day course with self study elements and a Practical Assessment (undertaken by the Tutor). The Written Exam is on the final day.

Faculty of
Occupational
Hygiene
