

The best in storage order-picking.

## SLIDING SHELF FOR STANDARD PALLET RACKING

The mobility of the goods laid out on sliding shelves facilitates the pick-up using forklifts, hoists or during manual handling.

### Rational storage for :

- line assembly components.
- consumables.
- unfinished goods.
- finished product.
- tools & dies.
- assembly jigs.
- spare parts.

### Sliding shelf specifications

Galvanized slides use steel bearing.

Travel distance : 70% of the storage surface.

Shelf capacity : 400 kg to 1000 kg, evenly distributed load.

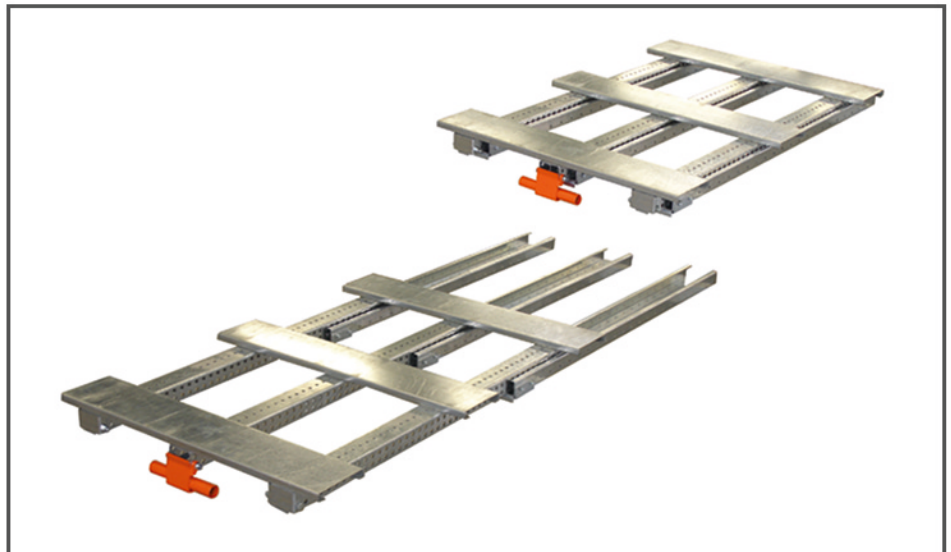

Handle lock and foot lock bolt the sliding shelves in the pushed position.
