

PJR SERVICES BULLETIN

After all the upheaval of the last year or so, it looks like we may actually get a summer of sport and PJR are pleased to be able to help....

Now life is starting to open up again, we have been busier than ever, receiving lots of calls to help get sports grounds operating again. We have recently taken on two football grounds and of course our school line marking is back in full swing, all over Essex. There were so many events and sports cancellations last year (at grass roots level and professionally) that it felt like things would never get back to normal. So it's a real pleasure to be able to get sites up and running again.

To assist us, we have a couple of new fully CRB checked team members ready to hit the pitches.

The weather wasn't exactly on our side in May, and there were many times Paul was ready with his mower and lining equipment and the heavens opened. However we still managed to get through lots of line marking paint and are looking forward to a long Summer helping schools and sports grounds get kids back out in the fresh air.

We recently received this wonderful testimonial from Julie Noble School of Performing Arts which we wanted to share.... 'PJR have been extremely supportive during the pandemic. We are proud to say we have a COVID secure building. The deep cleans have been fantastic, the building and all the equipment have been maintained to the highest standards throughout the Pandemic. We highly recommend PJR Services.'

BOREDOM BEATER

Can you solve the brain teaser?
(Answer at the bottom of the page)

'A man calls his dog from the opposite side of the river. The dog crosses the river without getting wet, and without using a bridge or boat. How?'

Welcome...

...to new team member Adam, who is starting with us as a Ground Worker as we enter our busy Summer period.

PAUL'S MONTHLY TIP...

In June it's time to make sure you are on top of watering your grounds. If the Summer weather is as it should be, the soil can actually dry out very quickly. The key is to provide enough water, while using it economically. Water in the mornings, because as soon as the sun comes up grass and plants will start to make good use of it and lose less through evaporation. Water will be used much more efficiently. Low water waste and happy plants! Win, win!

Teaser Answer: The river is frozen
