

WEATHERPROOFING ADVISORS LIMITED

Shell

Sawbridgeworth

The retail unit was suffering from various constant leaks. Weatherproofing Advisors provided Johnson Controls Limited with a proposal to fully remove the existing tiled roof and replace with a new system. The retail unit had to remain open for the full duration of the works to service the fuel station.

The proposed system involved carefully removing the tiles, repairing and making good of any damaged timber joists and felt membrane whilst ensuring that no debris or water entered the retail unit below.

The Decra tiles were then installed complete with purpose made flashings.

The new system is extremely durable and offers superior weather protection and therefore maintenance costs are minimal. Also, the steel core within a Decra classic tile provides unparalleled strength compared to traditional materials.
