MORE COMFORTABLE. MORE USABLE.

Easy to control and exceptionally maneuverable, the Lift-Rite Walkie simplifies material handling tasks around the warehouse, on the dock, or in trailers. Designed for superior operator comfort and confidence, the truck handles loads up to 3,500 lbs with minimum effort and maximum precision.

» Greater productivity with battery and truck information shown on a real-time display.

» Superior efficiency with a lift/lower cutout that prevents lifting on a low battery so the unit can be moved to a charging station.

» Enhanced operator comfort with a long, ergonomically designed tiller and easily accessible controls for left- and right-handed users.

» Faster, simpler recharging with convenient onboard charger.

» Easy startup and controlled user access with simple on/off key switch.

» Greater control in tight areas with superior maneuverability at slow speeds with the tiller upright against the truck.

MORE MAINTAINABLE. MORE RELIABLE.

Engineered to minimize maintenance requirements—and to simplify servicing when it is needed—the LRW35 offers exceptional durability for long-term reliability and productivity.

» Greater uptime with quick, easy, tool-free access to internal components.

» Faster, simpler maintenance with a battery watering system that can extend battery life and performance.

» Easy lifting and servicing with convenient built-in hoist hooks
