Dear NEDAERO relation,

In this regular Newsletter we will keep you updated on our aerospace related products and service developments.

Improved Fiber Optic Gyroscope

NEDAERO is manufacturer of the FOG (Fiber Optic Gyroscope), a palm of the hand-sized angular rate sensor. In 2018 NEDAERO built a Fiber Optic Gyro with a bias stability of 1° /hr. Since then we continued to test and improve this FOG and now we are proud to announce that we currently have reached a sensitivity/better bias stability of 0.2° /hr.

The sensor is suitable for flight stabilization and attitude control of aircraft, helicopters, drones and missiles. Next development initiatives comprise a new model as well as Inertia Navigation Systems (INS).

Make it easy on yourself and find your part on our website

Did you know we have a [Capability Search](#) on our NEDAERO website? With this tool you can easily search for repair items and approved replacement parts. In the downloadable PDF-file all parts are listed.

Are you in need of a new part? We can also assist you in that by offering our [Parts Search](#). In this database you can search for parts from our supplier network. Also here a downloadable PDF-file is available.

For Exchange items we can refer to our [ATR and AS350 Exchange pool page](#).

Can't find your item? Our Customer Services department can help you in your search. For Helicopter parts please call +31 172 796 555, for Turboprop parts please call +31 316 592 100.

Standard inventory of parts - AS350 and ATR Exchange pool -
warehouse 20 minutes from Schiphol Airport - immediate shipment

Manufacturing - Maintenance, Repair & Overhaul - in-house capability -
high-tech production and test-equipment - over 40 years of experience
