

SinglePoint is an AI-powered enterprise portal platform optimized for market research and competitive intelligence, designed to serve complex, global organizations, without adding a heavy burden on IT.

# SinglePoint

## Here's what you won't find anywhere else!

### AI behind every search

Not only results, but answers to your search query on the first page in a single search.

### Insights powered by machine learning

Let the machine read the documents on your search result and write a report on the results that it finds

### Personal Smart Search Assistant

Learns what your interests are and uses that knowledge to present new content as it becomes available.

### 45-day roll-out Yes, really!

From what we hear, that's about 300 days faster than the competition.

### Search engine technology designed for business

Unlike other document management systems, SinglePoint will NEVER say "No results are available"

### 100% secure - guaranteed

We've passed every security test thrown at us by clients' IT departments.

### Multiple clients for over 10 years

That's longer than the other guys have even been around!

### "No surprise" pricing

Upfront, completely transparent pricing.

### Primary and secondary document sources

Whether a document was produced in-house, is accessible through a subscription, or is from a news source, you'll get it all in one place with SinglePoint.

We power the world's  
most critical enterprise  
knowledge portals

# SinglePoint

## And yes, we also do:

### Customized portal branding

Your portal will fit right in with your organization's visual look and feel.

### Easiest company to work with

Friendly and helpful staff that cares passionately about your success.

### Dashboards

Strategic dashboards curated by subject matter experts distribute information to users without them ever having to search.

### Tell your story without IT

Create compelling and graphical Dashboards with drag-and-drop widgets and WYSIWYG editors

### Newsletters

Keep your users informed and share knowledge management ideas.

### File upload system

SinglePoint will accept and make searchable any file type - even video

### Portal Admin Community

Join the community, ask questions, and learn best practices with our Annual Portal Admin Summit, webinars, regular meetings with CRM, support site, and more.

### Uptime and Security

The NSA is jealous of our uptime and security... but that's all we can say about that.
