

SLTN High Lift Pallet Truck

The SLTN10 is a single cylinder high lift pallet truck with a 1000kg capacity.

Due to the scissor action, High lift pallet trucks are designed to be used only with open bottomed pallets.

Maximum lift height on this unit is 800mm, with across fork dimensions of 540x1170mm. With independent fork sizes of 160x50mm section.

Single cylinder (single hydraulic ram) high lift pallet trucks are known to be more reliable as there are less hydraulic seals used in its design.

High Lift Pallet Trucks are useful when loading / unloading pallets and help to minimise back injury caused by repetitive strains, particularly on production/piece worker lines.

Specifications:

Minimum Fork Height: 85mm
Maximum Fork Height: 800mm
Capacity: 1000kg
Load Roller: 78x60mm
Steering Wheel: 200x50mm
Net weight: 125kg
