**Why struggle with the wrong tools
for the job?**

The most important task of any fashion designer is to translate wonderful new ideas into exciting creations that delight the prospective purchaser. Fabrics need pressing but why risk spoiling that new creation with an iron that may burn or scorch the precious fabric?

OmniSew has been supplying the trade with a range of professional ironing solutions since 1978 and have pleasure in offering you the very best and easiest to use steam irons and heated vacuum boards.

We are a customer-focused company aiming to delight our customers with the quality and reliability of our products. For example, the most important component of all steam products, the heating element, enjoys a 3-year warranty.

OmniSew also offers electric hand cutters plus a range of specialist industrial sewing machines adapted to make the sewing of wedding dresses and Irish embroidery a breeze.

Cut it Right, Sew it Right and Press it Right!

To help you make the right investment in tools for your business, OmniSew has pleasure in offering easy payment terms on all steam and sewing products over £250.

Call David now to discuss your requirements.
