

Medication for Clinical Trials and Studies

MODEPHARMA provides a reliable and cost-effective approach for sourcing and organising medication for academic/non-commercial clinical trials and studies.

We aim at supporting NHS trusts and non-profit organisations. By working alongside Hospital Pharmacy and R&D, our forward-planning services for Investigators help improve the quality of trials, save costs, avoid delays and increase trial flexibility.

MODEPHARMA TRIAL MEDICATION SERVICES

TRIAL DESIGN STAGES

- Provide medication production feasibility and budgeting assistance.
- Assist in optimising the design of the trial medication and selecting the most advantageous option based on clinical trial variables, and manufacturing and stability dependent factors.
- Provide the most competitive quote from our network of contract manufacturers.

TRIAL IMPLEMENTATION STAGES

- ➤ CTA application assistance
- Set up a Technical Agreement between the Sponsor/Investigator and the contract manufacturer.
- ➤ Co-ordinate trial medication manufacturing, distribution, returns and destruction.
- Ensure all GCP and GMP requirements around the Investigational Medicinal Products are met.

Working with leading pharmaceutical contract manufacturers allows us to offer high quality Investigational Medicinal Products with extensive dosage, design and packaging options – all at a competitive price.
