Who are we?

Specialist Dental Services have brought together leading **NHS Hospital Dental Consultants** in order to offer you a first class private service from simple fillings and oral care through to dental implants, maxillofacial surgery, orthodontics, cosmetic makeovers and specialist children's dentistry.

We specialise in **comprehensive and complex specialist treatments** and are able to offer multi-disciplinary dental care under one roof in the West-end of London to the highest possible standards and satisfaction to our patients and the referring dentists.

All our consultants have undergone extensive specialist training and Royal College examinations in the UK, which is an essential prerequisite to become a NHS Consultant. This training includes at least 5-year specialist training programmes in the leading NHS Hospitals within the UK. All our consultants are also based in NHS Teaching Hospitals in London and are involved in training of future specialists and consultants.

We emphasise on **wellbeing of our patients** and give a great deal of attention to aesthetics. However, we strongly believe that aesthetics are not just achievable with "brilliant white porcelain", but by achieving a harmony between healthy teeth, gums and the face. We resist destructive short term "makeovers" and warn our patients of the long-term consequences.

Our friendly and professional team will put you at ease and we welcome children as well as adults. The team is dedicated and is committed

to high standards of work, continued professional development and is actively involved in teaching, training, and research activities.

We are very conveniently located in London's premier health-care district of Harley and Wimpole Street.

We welcome patients and specialist referrals for restorative dentistry, periodontics, endodontics, prosthodontics, dental implants, orthodontics, oral & maxillofacial surgery and paediatric dentistry.

Meet the team:
