DERMALIFT MICROFACE

Non Surgical Micro – Current Facial Lifting

Relax and let the new Dermalift Microface do the work. Now utilising the latest technology in digital readout microprocessors and easy to use touch button controls, all ensuring optimum comfort, performance and reliability.

The Microface offers your business an extremely profitable treatment system, which can be used for both corrective or preventive treatments. Dermalift Microface will provide you & your business with a range of anti-ageing treatments that will appeal to a wide variety of clients, both men and women, genuinely enabling you to satisfy each and every client's individual needs.

Dermalift Microface will successfully lift and tone tired and sagging muscles and reduce lines and wrinkles that form around the eyes, forehead, mouth, cheeks, neck and throat area. Improving circulation and fighting the signs of ageing, resulting in a much improved, fresher and youthful appearance.

Your clients can experience...

- Reduced lines and wrinkles
- Facial muscles lifted and toned
- Firmer facial contours
- A more youthful appearance
- Finer pores due to increased elasticity
- Improved acned skin
- Fresher improved circulation
- Much younger skin texture
- Released expression and stress lines
- Improved moisture retention
- ADLA (Advanced Dermalift Lymphatic Activation)

DERMALIFT PROFILE

The Total Face & Body System

Ultimate Computerised Multi-Functional System

Never before has there been such a multi-functional treatment that is able to offer so much. Computer controlled face and body lifting, profiling and skin enhancing. Backed by 30 years of research and development, the Dermalift Profile out paces other similar systems.

MULTI-PLEX – with the new Multi-Plex facility, clients can loose inches whilst enjoying a relaxing micro-current face lift or Dermafusion anti ageing facial

- Ultimate inch loss system (Incorporates the Interslim 24 pad system)
- 8 specific programmes (inc. Fast Slim)
- Face and Body Lifting
- Profiling Face & Body tissue enhancement
- Lymphatic drainage (face and body)
- Adaptable to clients specific needs
- Advanced Cellulite & Slimming treatments
- Computer controlled
- Massaging, lifting, circulation, tightening and firming

The Dermalift Profile can be described as the ultimate treatment system. A computerised system that delivers a variety of speeds, frequencies and modes of operation. Your clients will be able to achieve the equivalent of carrying out 350 sit ups or buttock raises in just one 20 minute session. In many cases resulting in measurable inch loss after just one treatment.

In addition to its 24 pad inch loss system, this fully computerised unit offers pre-set microcurrent programmes for the face & body to boost lifting, tightening, firming and massage.

The Profile provides a complete microcurrent facial lifting and a 10 pad lymphatic section, (ADLA), for the face. This touch control, multifunctional advanced system will boost any salon, spa or educational facility, ensuring business growth, profit generating and encouraging client loyalty. A truly multi functional total system.

THE SONOPEEL

Ultrasonic Skin Peeling and Regeneration

Skin will go from 'Matt to Silk in just 25 minutes' truly describes the Sonopeel's action. It effectively applies 28,000 oscillations (per second) to swiftly and effectively peel the skin. Disposing of dead skin cells, unblocking pores, lifting atmospheric debris and free radicals that regularly damage our skins. It will then ultra sonically regenerate and infuse any number of treatments to suit and maximise each particular clients anti ageing needs.

It is extremely fast and effective, but is not as aggressive as some other methods of peeling. Swiftly the sonopeel will deal with acne scarring, stretch marks, blocked pores, pigmentation, lines & wrinkles. Atomising dead skin cells and removing free radicals.

An exciting aesthetic innovation that delivers extremely effective peeling and regenerative treatments that overcome the tell tale signs of ageing.

Because of the aggressive environment to which we are exposed to daily (sun, wind, cold & general pollution etc..) skin becomes both damaged and effected, causing it to dehydrate and therefore age prematurely.

Our complexions become less than perfect, when effected by blocked pores, poorly oxy-generated skin and general signs of ageing. These conditions cannot normally be rectified by general cleansing and moisturising routines.

Now the ultrasonic peeling system Sonopeel will solve many of these problems with immediate effect delivering a new fresh skin condition and appearance.

The Sonopeel system allows for both deep peeling and regeneration of the skin (with no side effects) resulting in remarkably renewed youthful refreshed skin.

- Leaves the skin feeling soft and smooth to the touch
- Regenerates the revival of new skin tissue
- Minimises scars and stretch marks
- Non aggressive
- Clarifies the complexion, reducing blemishes & pigmentation
- Removes dead, dry skin from the face & body

“Transform dull, matt skin to silk in 25 minutes”

The bringing together of Nature, Science & Technology

DERMAFUSION

Unique & Innovative Breakthrough In Anti Ageing Treatments

Dermafusion is the infusion of specifically selected nutritional interactive ingredients which synergistically work in harmony to treat and prevent the signs of ageing. Additionally, clients who need specific help for a variety of conditions, or just wish to maintain a youthful and attractive skin, can be comprehensively treated with these up-to-the-minute products & treatments. Already successfully distributed in over 20 countries. Backed by Silhouette International, professional market leader in salon & spa treatments for 32 years. Its experience and knowledge is equalled only by a few.

Simply select and apply a specific treatment, either in a physical or microcurrent manner; the Dermafusion range of treatments will ensure that you and your clients will see and feel the difference in numerous ways, in some cases, almost immediately.

When applying the products with a Dermafusion or Dermalift system, you will be able to achieve twice the penetration of the products active ingredients in half the time, maximising the efficiency and effectiveness of each particular treatment, whilst maintaining client comfort and satisfaction.

This enables the therapist to carry out 2 x unrivalled full facials, or 3 eye treatments in less than an hour.

Fast, Effective & a Great Profit Generator

By utilising these supercharged and unique product applications, your business will benefit from the exceptionally profit margins that will be generated, additionally increasing your client base, ensuring their loyalty to you and such effective and satisfying treatments.

Within the range, there are products which can be used at home to maintain the effectiveness of the supercharged salon / spa treatment, ensuring longer lasting results.

Technical Features and Benefits

With each system comes an initial supply of support materials, such as posters, point of sale leaflets, client record cards, training manuals and before & after photographs (eyes).

All to assist in promoting your business internally and externally. Additionally there will be unique treatment products supplied, specially formulated to capture and maintain the maximum results achieved by your Sihouette System.
