# LEISURE MATS

Floor matting has numerous applications in the leisure industry where underfoot safety and comfort are of paramount importance. The Blue Diamond range contains a comprehensive selection of products designed to enhance sports and leisure environments.

Duckboard type matting can be used to reduce slip hazards around swimming pools and other wet areas, especially important in public facilities where old or very young persons may be at risk.

Rubber matting in gymnasium areas provide shock absorption to protect floors and equipment, as well as improving noise control and comfort.

The use of cellular rubber matting in outdoor play areas, public footpaths and golf courses provide a simple solution to erosion control and safety requirements.
