

# Elecard Multistream Player

Video  
Quality  
Monitoring

Elecard Multistream Player is a broadcast monitoring tool that enables 24/7 multichannel visual and automated analysis of live feeds. With a configurable software-based architecture and an easy-to-use interface, the tool reduces the complexity of multichannel monitoring and allows smooth integration with broadcast, OTT and IPTV systems.

## SPECIFICATION

Input interfaces

Ethernet IP, SDI, HD-SDI, DVB-ASI, HDMI, CVBS (Analog), DVB-T/T2, DVB-C/C2

Transport protocols

HLS, RTP, UDP, RTSP

Multiplexing formats

MPEG-2 Transport Stream (SPTS or MPTS)

Video formats

H.265/HEVC, MPEG-4 (H.264/AVC), MPEG-2

Audio formats

HE AAC v.1 and v.2, AAC LC, MPEG-1/2

## Main features

- Visual control over video quality, current audio level and bitrate of the input channel
- Simultaneous monitoring of a predefined number of channels
- Full-screen mode for selected channel
- SNMP support for integration with external systems
- Audio error alert
- Information about video format
- Intel®Quick Sync video technology support for better performance results
